MeTra MPS-UNDG-KT1 Underglow Kit with Controller

Product Information

The MPS-UNDG-KT1 is an underglow kit that includes six LED tubes and a Heise controller. The controller has the option for turn signal and brake functions, and an RGB controller for speed adjustment and brightness adjustment. The kit comes with 2 clamps for the front and rear tubes, and 4 clamps for the side tubes. The product is manufactured by MetraOnline.com and has a technical support line at Techsupport@metra-autosound.com or via phone at 368.257.1187.

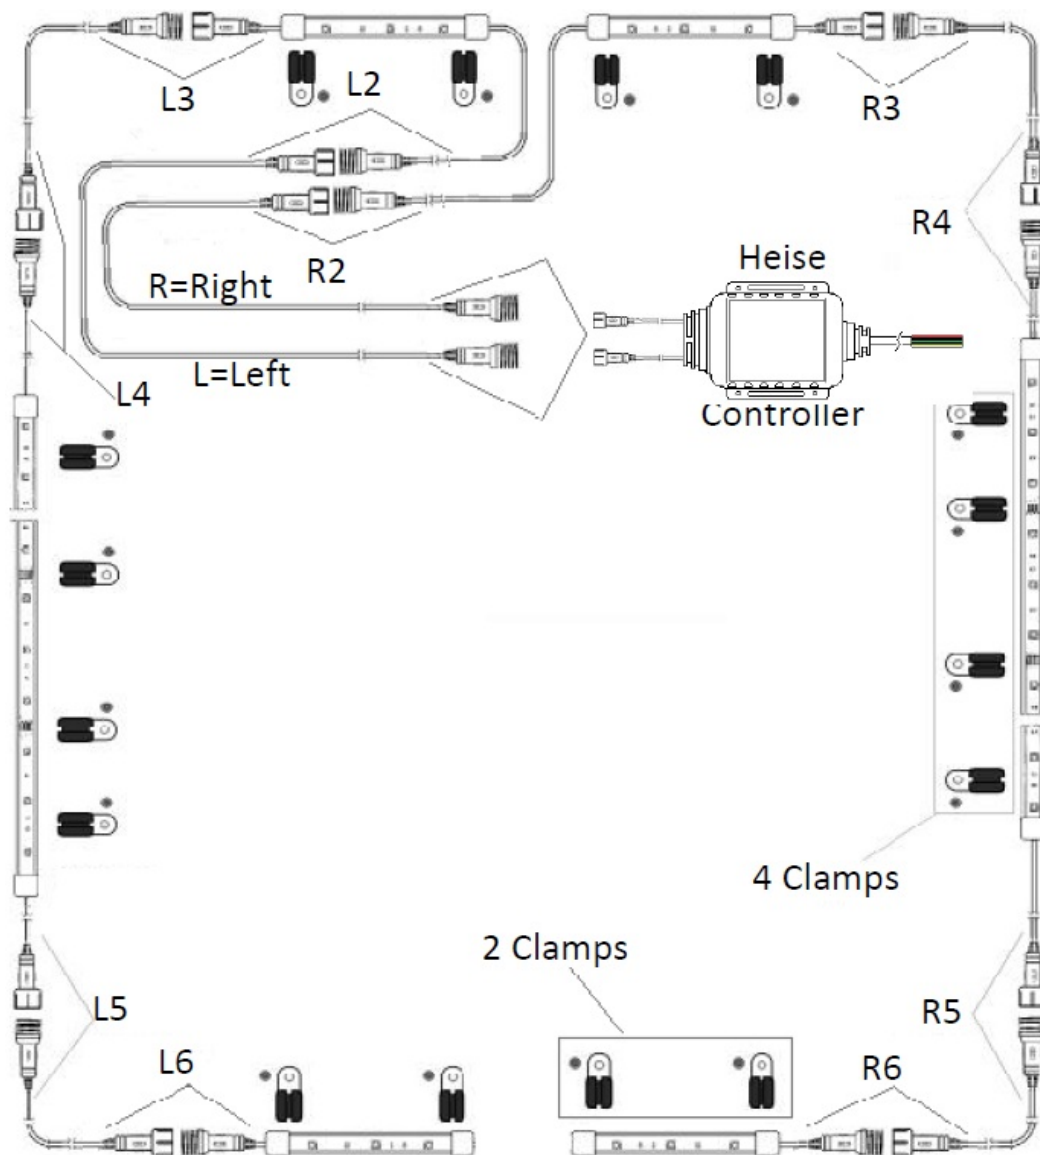

Product Usage Instructions

1. Review the vehicle and locate suitable places to mount the six LED tubes. Avoid locations that are hot, move, pinch points, the gas tank, and gas lines.
2. Side tubes get 4 clamps; front and rear tubes get 2 clamps. Try to evenly space the clamps, and do not position the clamp directly over an LED.
3. Starting at the controller, connect the left extension (driver side) and route to the front left tube, orientating the tube.
4. Mount the tube with supplied hardware, and secure the cable every 12 inches with the included zip-ties.
5. Continue to connect the tubes and extensions, matching the flag labels, and mounting the tubes as you go.
6. If you want to use the turn signal and brake functions, connect the green wire to the left turn signal (+12VDC), yellow wire to the right turn signal (+12VDC), and white wire to the brake light (+12VDC).
7. If you want to use the RGB controller, press and hold for 5 seconds to lock the controller to work only with this remote. (The app control will continue to function.)
8. If you want to unlock the controller from the remote, press and hold for 5 seconds.
9. If you need technical support, contact the technical support line at 386-257-1187.

Installation Instructions

Review the vehicle and locate suitable places to mount the six LED tubes. Avoid locations that are hot, move, pinch points, the gas tank, and gas lines.

1. Side tubes get 4 clamps; front and rear tubes get 2 clamps. Try to evenly space the clamps, and do not position the clamp directly over an LED.
2. Starting at the controller connect the left extension (driver side) and route to the front left tube. orientating the tube.
3. Mount the tube with supplies hardware, and secure the cable every 12 inches with the included zip-ties.

RGB Controller:

The controller has the option for turn signal and brake functions. By connecting the following wires, the whip will flash amber with vehicle's turn signal, and illuminate red when braking.

- Green wire – Left turn signal (+12VDC)
- Yellow wire – Right turn signal (+12VDC)
- White wire – Brake light (+12VDC)
