Frequency	**2400 – 2483.5 MHz**
Max output power	**0,04875 W**

KEY BENEFITS

- Intercom System, Dynamic Mesh Communications (DMC™) – Meet Midland Teams M-15 headset, a uniquely dynamic intercom system with self-healing capabilities that connects up to 15 randomly moving team members. The always-on, full-duplex, hands-free communication technology is a 100% autonomous network (no need for any base station), designed to perform under the toughest environments.
- Full-Duplex Communication Technology
Multiple intercom networks can operate in the same terrain allowing several teams to speak simultaneously

without interruption.

- Hands-Free Operation

  Natural Voice Operation and Always on Communication allow hands free operation – no need to press buttons or turn dials. The always-on communication technology provides the utmost in safety. Team members can operate/activate the system simply by voice commands such as "Radio On," allowing team members to keep their hands free and focus on their tasks.

- Level Dependent / Listen Through – Reduces impulse noises and allows ambient noise including amplification of the human voice.

- 100% Autonomous Network

  With Midland Teams M-15, no additional base station is necessary, so it works anywhere without the need for additional equipment. Autonomous networks allow team communication where standard systems are blocked or are non-operational.
