MIDLAND®

MIDLAND UCS Ultracom Single Intercom Communication System
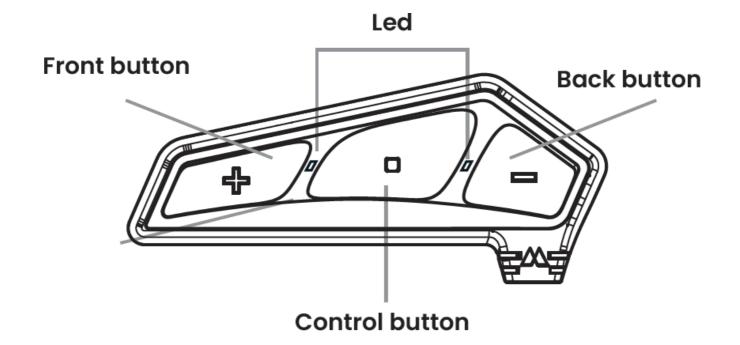

Product Specifications

- Controls: Front button, Back button, Control button
- Pairing Options: Phone, TFT, GPS, Midland Intercom, OBI, Universal Intercom
- Intercom Functionality: One-to-one communication, Conference mode up to 4 people
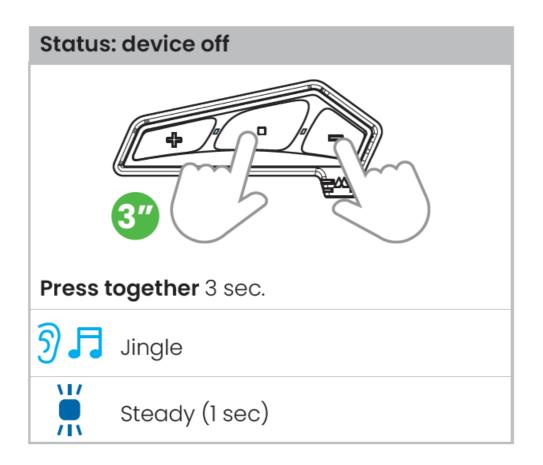

Product Usage Instructions

- Press together the Front and Back buttons for 3 seconds until you hear a jingle. The LED will be steady for 1 second.
- Press together the Front and Back buttons for 3 seconds until you hear a jingle. The LED will be steady for 3 seconds.
- While the device is on and during playback, keep the Front or Back button pressed to increase or decrease the volume, respectively. A beep will indicate volume changes.
- Note: Music, phone calls, and intercom volumes can be adjusted independently.
- To pair with different devices like Phone, TFT, GPS, Midland Intercom, OBI, or Universal Intercom, follow the specific pairing instructions provided in the manual.
- The device supports one-to-one communication and Conference mode, allowing communication with multiple intercom devices simultaneously. Use the Control button to access intercom functions.
- Note that while in Conference mode, you can receive phone calls from the device paired to Control. The music will pause during the call and resume after closing the additional intercom communication.

Flashes		
Beep		
Steady (3 sec)		

Attention: you can pair a maximum of 3 intercom devices (Midland, OBI or other brand), one for each button. A new pairing on the same button overwrites the previous one.
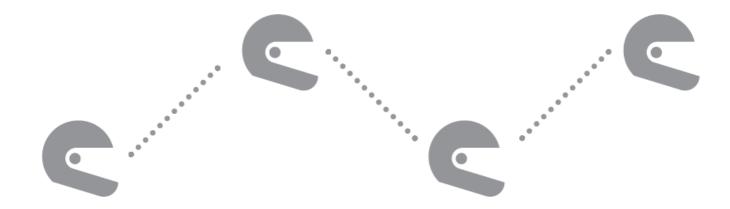

INTERCOM FUNCTIONALITY

- The "Intercom" communication allows you to talk to one person at a time, through any of the paired intercoms, or to talk to more than one intercom device at the same time (Conference mode).

Intercom communication one person at a time

- When the intercom communication is already open to one person, first close it and only then open the intercom communication to another person.

Conference mode

- When the intercom communication is already open to one person, just open the intercom to a second person without closing the first conversation. In Conference mode, you can talk up to 4 people in a chain (Conference to 4) Each intercom device can have two communications open simultaneously.

Note: in the device with the Conference mode activated (intercom open to the other two devices), you can, however, receive a phone call from the device paired to CONTROL (the music in the background and the second device will be temporarily disconnected and will be connected again when the second intercom is closed).
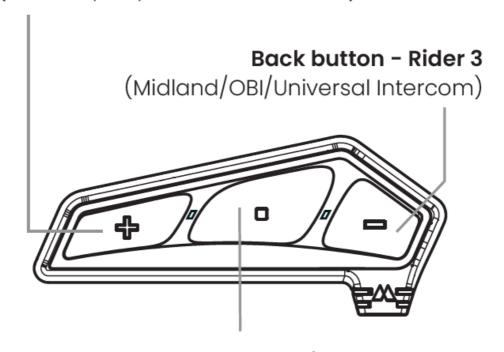

Note: to talk with Rider 1 or Rider 3 repeat the procedure but press the buttons corresponding to the pairings.
Note: To enable/disable VOX (voice-activated intercom communication), enable/disable Noise Gate (microphone mute in the absence of voice), and enable/disable AGC (automatic volume adjustment based on speed), use the Midland Connect App.
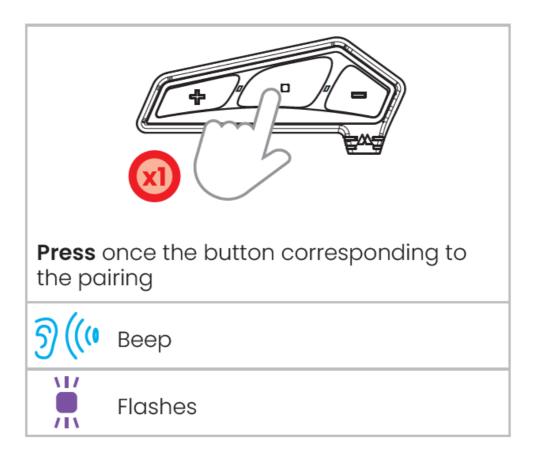

FUNCTIONS DESCRIPTION

FAQ

How many devices can I pair with the product?

You can pair a maximum of 3 intercom devices Midland, OBI, or other brands one for each button. Additional pairings overwrite the previous ones.

Can I adjust volumes separately for music, phone calls, and intercom?

Yes, each type of audio source has independent volume control which can be adjusted while listening.
