06 True Wireless Stereo Function

Speaker 1

Speaker 2

1. Set up the TWS system

Turn on two A10+ speakers and make sure no device connects with either of them. Double press one speaker's Bluetooth button and there will be a beep sound to indicate pairing is taking place. Once pairing is complete, there will be another beep sound.

2. Pair two TWS speakers with a Bluetooth device

Select Mifa_A10+ in the Bluetooth settings menu of the Bluetooth device. There will be a sound indicating a successful connection and the blue LED indicator keeps on.

3. Stop the TWS

Double press either speaker's button to disconnect it with the other one.

Tips:

1. For the first time of setting up the TWS system, the speaker you press the Bluetooth button one will work as the main speaker and the other one as the dependent speaker.
2. After the first connection, the main speaker will keep working as the main speaker and the dependent one will keep working as the dependent one in the future connection.
3. After setting up the TWS system, the dependent speaker's blue LED indicator stays on and the main one's LED indicates your operation.
4. The true wireless stereo function supports only 2 speakers.
5. After the TWS system is set up successfully, you just need to operate either speaker. The other one will do the same operation simultaneously.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the

user’s authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
