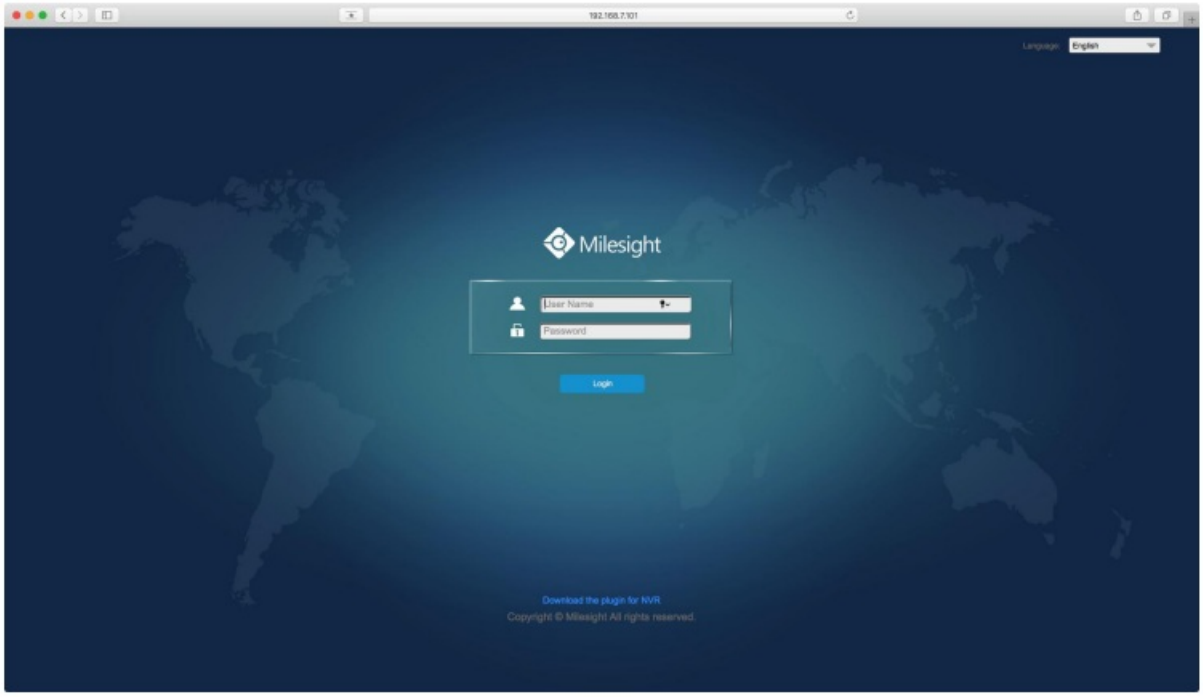
Milesight Plugin Installation on MAC Software

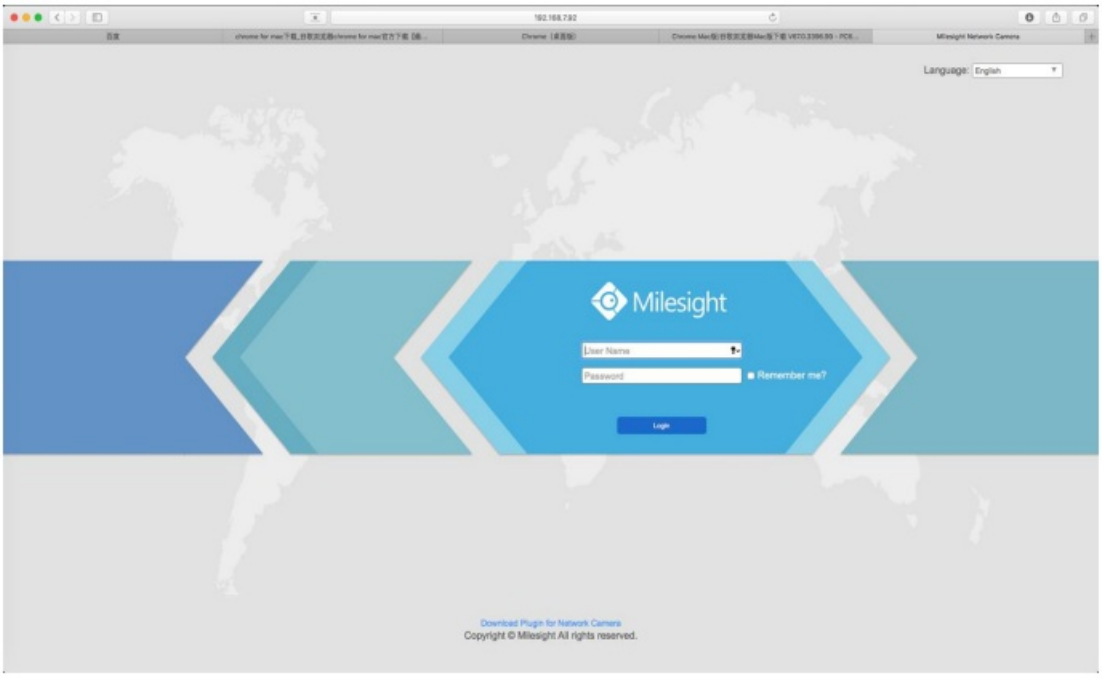


Installation

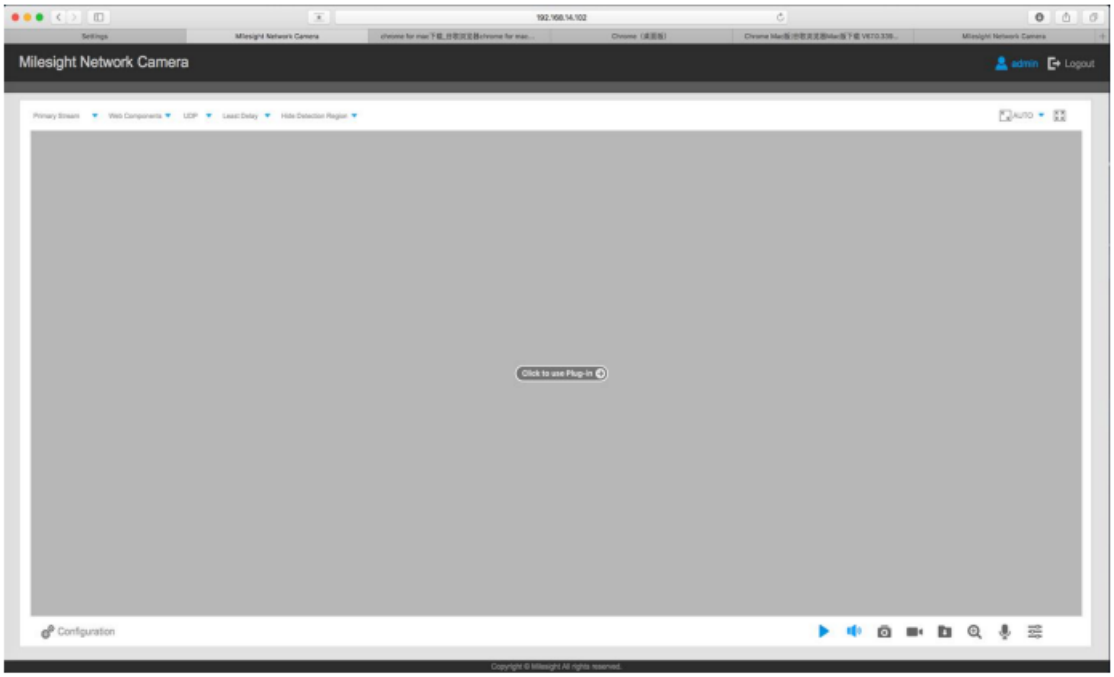
Camera Version	XX.7.0.65	Update	2016.7.11

Milesight cameras can support viewing the live video under MAC OS, while they need to be installed with the plugin “camview.dmg” first. For details, please refer to the steps as follows:

Step1: Open the camera web page via Safari, the web interface is as follows:



Step2: After logging in, without installing the plugin, the web interface is as follows:



Step3: Click the link on the center of the black screen to download the plugin. Double click the camview.dmg downloaded. It will turn into IPCComponent.pkg, double click the file to start installing.
