Operation buttons details

1. Fine grinding mode
2. Coarse grinding mode
3. Coffee powder mode
4. Power button

Finish process

Take out the tumbler and you can start drinking

- A small amount of coffee will continue to drip from the coffee maker after the process, but this is not abnormal.
- When using your own coffee cup, please be careful as it is hot.

Set Up

1. Place the appliance on a flat and horizontal surface table.
2. Connect the mains plug to the wall socket.

Make sure it is AC 220V.

You will hear a beep sound and the light will turn on.

Filling the tank with water

Open the water tank lid and fill with COLD water

- Do not fill the water beyond the MAX line (550ml).
- The tumbler given is with 550ml capacity.
- Fill water not less than 300ml.

Note: Make sure fill with COLD water. No hot water allowed.

Add coffee bean / pre-ground coffee powder

Put coffee bean / pre-ground coffee powder into the filter basket

You can put up to maximum 35g coffee beans/ pre-ground coffee powder. The capacity of given measuring spoon is about 6g per serving.

	Amount of water	Amount of coffee beans/ pre-ground coffee powder
Tumbler	MIN (300ml)	3.5 measuring spoon (20g)
	MAX (550ml)	5.5 measuring spoon (35g)

- The weight of coffee beans slightly varies depending on the coffee type. If you are not sure, try using less amount of coffee bean.
- You may adjust the portion of water and coffee beans/ pre-ground coffee powder according to your favourite.

When using the given tumbler

Set the tray and mesh plate

Place the mesh plate on the tray (with the two tabs facing upwards), and align it with the recess on the bottom of the main unit.

When using your own coffee cup

Attach the mesh plate to the mounting hole: Fit the tray into the recess on the bottom of the main unit.
