How to Apply & Remove Graphics

- Installation and removal of SEG graphics is easy!
- **Installation:** Push the SEG bead into each corner of the frame (1-4) with your thumb, then push the SEG bead into the middle of the run (5-8) and work your way around the perimeter of the frame until all beading is pushed in properly; if necessary, go around the perimeter again to ensure beading is secure in the extrusion profile.
- **Note:** Keep the set-up area clean by using a drop cloth, washing hands before set-up, or wearing gloves.
- **Removal:** Use the pull tab located on the graphic and gently pull the graphic from the frame, going around the perimeter.
Graphics Storage & Care

- Graphics should be folded with the graphic facing inward and stored in a zip lock /sealable plastic bag. Spot clean by wiping with a damp white cloth.
- If washing is necessary, use a commercial-size front-loading washing machine, and gentle cycle with cool water.
- Line dry flat. Dry cleaning is NOT recommended to prevent shrinkage.
