Product Diagram

Charge the Device

1. Please fully charge the product before first use, the indicator will stay red during charging, and turn off when finished.
2. When the device is in a low power state, the indicator light will flash red, please charge it in time with a DC 5V power supply input only. (Do not use a power supply higher than 5V).

Note: Charge the product at least once every 3 months when not used for a long time.

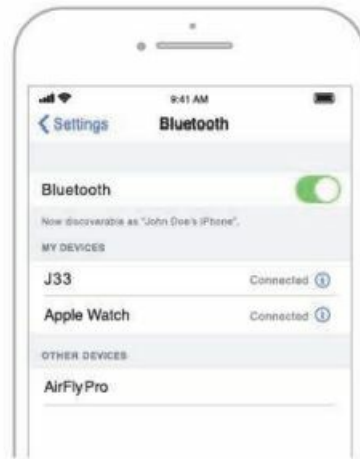

PAIRING

Pair with your Bluetooth-enabled smartphones, tablets, etc.

1. Press and hold the MFB for 3 seconds to power on, the indicator light flashes red and blue alternately. Now it's in pairing mode.

2. Turn on the Bluetooth on your Bluetooth device, search "J33" and connect. The indicator will turn blue when connected.

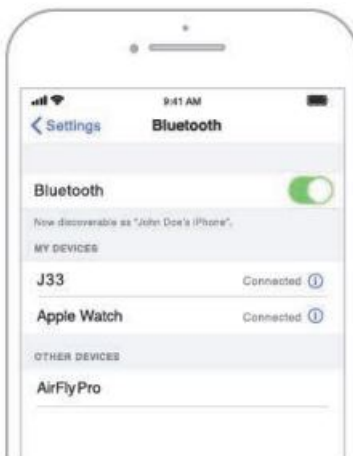

3. Connect the product to the AUX INPUT port of your desired source, like headphone/home speaker or car stereo system with provided 3.5mm audio cable, or plug your old 3.5mm wired earphone into the device.

4. Now you can enjoy music wirelessly or answer hands-free calls.

Pair with second smartphones, tablets, etc.

1. After successfully pairing with the first smartphone, turn off the Bluetooth function of the first smartphone, and the product will enter the pairing mode again.
2. Turn on the Bluetooth function of the second smartphone, search for “J33” and connect.

3. Turn on the Bluetooth function of the first smartphone, and select “J33” in your pairing history
4. Now two smartphones have connected to the receiver at the same time.

FCC Compliance Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, according to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used by the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF Exposure Compliance Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

CORRECT DISPOSAL OF THIS PRODUCT

(Waste Electrical & Electronic Equipment)

1. This marking shown on the product or its literature, indicates that it should not be disposed of with other household waste at the end of its working life.
2. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of waste and recycle it responsibly to promote the sustainable reuse of material resources.
3. Household users should contact either the retailer where they purchased this product or their local government office for details of where and how they can take this item for environmentally safe recycling.
4. Business users should contact their suppliers and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.
