MONACOR

MONACOR TR-1120LC 100 V High Performance Audio Transformer

Technical Specifications

- **Power Rating:** 120 W
- **Primary/Secondary Power:** 120/100/90/60/30 W
- **Impedance:** 4/8/16 ohms
- **Frequency Range:** 20-20,000 Hz
- **Dimensions:** 72 x 99 x 78 mm
- **Weight:** 2.06 kg
- **EAN Code:** 4007754027914

Product Information

The TR-1120LC is a 100 V high-performance audio transformer designed for use with amplifiers or speakers lacking an installed 100 V audio transformer. It has a power rating of 120 W, making it suitable for various audio setups.

Product Usage Instructions

Installation

1. Ensure the power source is disconnected before installation.

2. Connect the primary side of the transformer to the amplifier output terminals.
3. Connect the secondary side to the speaker input terminals.
4. Securely mount the transformer in a suitable location.

Usage

Once installed, ensure that the impedance settings match those of your amplifier and speakers for optimal performance. Adjust volume levels accordingly to prevent distortion and ensure clear audio output.

Maintenance

Regularly check for any loose connections or signs of wear. Clean the transformer periodically to prevent dust buildup that can affect performance.

PRODUCTINFOS

100 V high-performance audio transformer'

- An external 100 V transformer like this is necessary for an amplifier or speaker without an installed 100 V audio transformer
- Power rating: 120 W

Manufacturer information

- MONACOR INTERNATIONAL GmbH & Co. KG Konsul-Smidt-Str. 68 28217 Bremen, Germany

Frequently Asked Questions

Can the TR-1120LC be used with any amplifier?

The TR-1120LC is compatible with most amplifiers, but it is essential to verify impedance and power requirements to avoid damage.

What is the purpose of a high-performance audio transformer?

A high-performance audio transformer like the TR-1120LC allows for efficient power distribution and impedance matching in audio systems, ensuring quality sound output.
