SIDE HANDLE INSTALLATION

The side handles need to be installed. Attach each side handle using the four screws provided.

MAINTENANCE

Periodically clean the unit surfaces with mild detergent and water.

Auto wax can be used on painted steel (not on aluminum) toolboxes to preserve the unit's luster finish and protect against scratches. Apply the wax as you would to a car.

Grease and oil can be removed with most standard cleaning fluids. For safety, use a nonflammable cleaning fluid.

TROUBLESHOOTING

The position of the strikers can shift over time, causing problems closing and latching the lid.

To fix this problem, loosen the screws holding the strikers in position on either side of the toolbox. Adjust the position of the strikers until the lockbar engages the strikers properly when the lid closes. Tighten the screws securely.
