MOOSE KNUCKLES

## **Moose Knuckle Recovery Shackle Vehicle Size Reference**

## Product Information

### Specifications

- Shackle Sizes Available: 1/2, 5/8, 3/4, 7/8
- Pin Diameter: The pin diameter is 1/8 inch larger than the shackle's stated size

### Product Usage Instructions

#### Choosing the Correct Size Shackle

When selecting the right shackle size, consider the following factors:

1. Determine the vehicle size, type, or weight.
2. Check the hole diameter on your bumper or hitch mounts.
3. Some tow points may be oversized to accommodate winch hooks and other recovery gear.
4. Adapter sleeves can be used to adapt the correct size shackle to larger holes.

### FAQs

#### Q: What is the pin diameter of each shackle?

A: The pin diameter of each shackle is 1/8 inch larger than the shackle's stated size. For example, a 3/4 size shackle has a 7/8 inch diameter pin.

## SHACKLE SIZE REFERENCE

Vehicle size, type, or weight is your first reference for choosing the correct size shackle. The next reference is the hole diameter on your bumper or hitch mounts. Keep in mind that some points are oversized to accommodate winch hooks and other recovery gear. Adapter sleeves are available to adapt the correct size shackle to larger holes.

**PLEASE NOTE:** The pin diameter of each shackle is 1/8 inch larger than the shackle's stated size. The size labeled on the shackle is not the pin diameter. For example, a 3/4 size shackle has a 7/8 inch diameter pin.
