motepro Digi-Code Coding Instrucons

Both Digi-Code and Mul-Code are electronically the same.

MULTI-CODE Switches: UP for ON

DIGI-CODE Switches: DOWN for ON

1. Open both the working original remote and the new remote to reveal two x 10 switch banks (L/H Bank = L/H Buon) on the circuit board or one bank of 10 switches for a single buon remote.
2. Copy the switches exactly when coding Mul-Code to Mul-Code or upside down when coding Mul-Code to Digi-Code.

If no working remote is available look to the receivers on the motor/s (these are generally grey rectangular boxes aached to the motor. Remove the inspecon panels to reveal the 10 switches. This will mainly be a Mul-code receiver. Follow the steps above once you have located the switches on the receiver.
