6V or 12V if using Wildgame Innovations 6V

MOTOR BATTERY — or Moultrie Ranch Series Auger

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures;

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation RF Exposure Warning Statements:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment shall be installed and operated with minimum distance 20cm between the radiator & body.

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s) Operation is subject to the following two conditions:

1. This device may not cause interference.
2. This device must accept any interference, including interference that may cause undesired operation of the device.

Radio Frequency Exposure Statement for IC

This equipment complies with IC exposure limits set forth for an uncontrolled environment. This equipment shall be installed and operated with minimum distance 20cm between the radiator & body.

## SETTINGS + MAINTENANCE

### SIGN UP FOR NOTIFICATIONS

Go to Account > Notifications and opt into notifications for low feed levels, low battery levels, or a feeder clog/jam.

### ADJUST SCHEDULES + FEED ON DEMAND

Use the app to view feed levels, battery levels, or adjust feed times from anywhere. Feed schedule changes will update at the next previously-scheduled feed time.

**REPLACE BATTERIES + REFILL FEEDER**

Sign up for notifications or check the app to see when your batteries or feed level is running low. After refilling feed, remove and reinstall a single AA battery to reset the Feed Level Detector. Then press TEST on the FEED HUB UNIVERSAL to run the feeder and see the updated feed level in app.

**Note:** FEED HUB UNIVERSAL does not work on gravity feeders. For more information and a list of compatible feeders, visit: [MoultrieMobile.com/feedhub](https://MoultrieMobile.com/feedhub)

**NEED HELP?**
