# MOVE SPEED

**MOVE SPEED Solid State USB Flash Drive App**

## Product Information

### Specifications

- **Supported Languages:** English, Chinese (additional languages will be available in the future)
- **Fingerprint IDs:** Up to 10

### Product Usage Instructions

#### APP Software Download

1. Connect the USB drive to your PC.
2. Locate the default apk file in the USB drive and transfer it to your phone.
3. If you prefer to receive the software directly, please contact us and provide your email address.

#### Change Language

**Note:** The current available languages are English and Chinese. Additional languages will be available in the future.

1. Open the drive on your phone.
2. Navigate to “Setting” > “Language”.
3. Choose the language you want to use from the available options.

## **Set Password and Fingerprint**

1. Plug the USB drive into your phone after downloading the app.
2. When prompted, select an application for the USB device and click "OK" to open it.
3. Click "Confirm" to allow OTG permission.
4. Click "Confirm" to set a password. Remember the password as it is essential for accessing the data. If you have already set a password on your PC, enter the same password here.
5. Enter the password and click "Next Step" to set up fingerprint authentication.
6. Enter a name for the fingerprint.
7. Place your finger on the sensor and repeat this step several times to complete the fingerprint setup.
8. You can now use the software to back up images, videos, documents, music, albums, and contacts.  
Additionally, you can perform a full backup of your phone and restore data. Note: Make sure to back up all data before attempting to restore on a phone.

## **Change Password and Add Fingerprint**

1. To change the password, go to "Setting" > "Encryption Manage" > "Change Password". Enter the new password and click "Determine".
2. To add a fingerprint, go to "Setting" > "Encryption Manage" > "Add Fingerprint". Enter a fingerprint name and click "Next Step". Place your finger repeatedly on the sensor until the setup is complete.

## **Turn on and Turn off Fingerprint**

**Note:** You can only delete passwords and fingerprints on a PC.

1. Go to "Setting" > "Encryption Manage".
2. To turn on fingerprint lock, click the "Turn on Fingerprint Lock" switch.
3. To turn off fingerprint lock, click the "Turn off Fingerprint Lock" switch.

## **Data Backup**

1. Open the software and click on "Phone".
2. Select "Picture".
3. Choose the pictures you want to back up.
4. Click "Copied to The" and select the target path or create a new folder.
5. Click "Confirm". For video files, click on "Video".

## **Contacts Backup**

1. On the homepage, click on "Contacts Backup".
2. Click "Backup Now".

## **8. Phone Backup**

1. On the homepage, click on “Phone Backup”.
2. Click “Backup Now” to back up all the files on your phone.
3. **Note:** Do not restart or turn off your phone during the backup or restore process to avoid data loss. Click “Finish” after the transfer is complete.

### **Restore Phone**

**Note:** Make sure to perform a phone backup before restoring.

1. On the homepage, click on “Restore Phone”.
2. Select the phone you want to restore.
3. Click “Next”.
4. Select the files you want to restore.
5. Click “Start Restoring”.

### **Auto Backup Setting**

1. Go to “Backup Setting” on the Setting page.
2. You can enable or disable the Auto Backup function.
3. Select the types of files you want to automatically back up.

**Note:** We do not recommend enabling “Delete local backed up data when the backup is complete”.

### **Frequently Asked Questions (FAQ)**

- **Q: Is it normal for the USB drive to heat up during operation?**

A: Yes, it is normal for the USB drive to generate heat during operation. There is no need to worry about it.

- **Q: How many fingerprint IDs can I set?**

A: You can set up to 10 fingerprint IDs for convenient office team usage.

- **Q: Can I change the language of the software?**

A: Yes, you can change the language of the software by going to “Setting” > “Language” and selecting your preferred language.

- **Q: What should I do if I forget the password?**

A: If you forget the password, no one will be able to access the data. Make sure to remember the password. If you have already set a password on your PC, enter the same password to access the data.

**Note:** The USB drive will be a little heat during work, but it is a normal situation and you don’t need to worry about it.

### **APP Software Download**

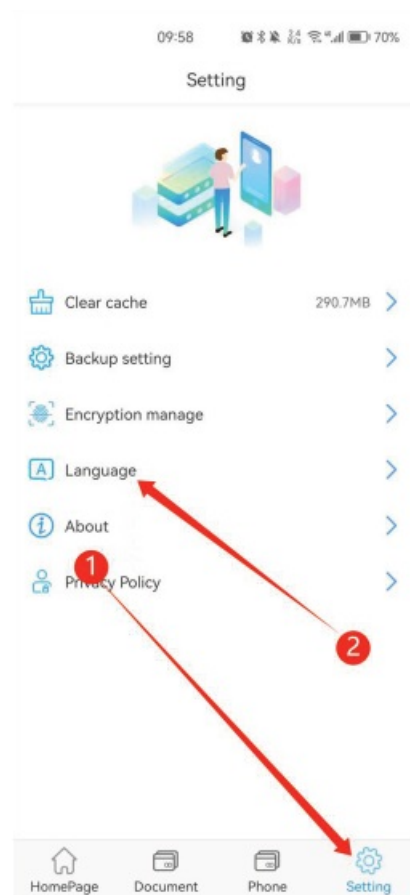

1. Open the drive on PC, there is a default apk file and you can transfer it to your phone.

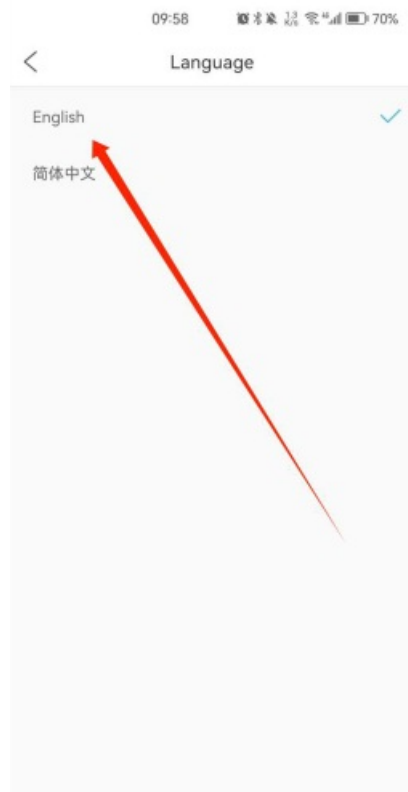

This PC > MOVE SPEED (D:) >			
Name	Date modified	Type	Size
MoveSpeedDrive_1_0_008.apk	8/19/2022 10:06 AM	APK File	49,504 KB
安卓系统指纹加密U盘使用方法	8/19/2022 10:03 AM	WPS PDF 文档	3,108 KB
PC端指纹加密U盘使用方法	8/19/2022 10:03 AM	WPS PDF 文档	597 KB
