All you need to know before Installation

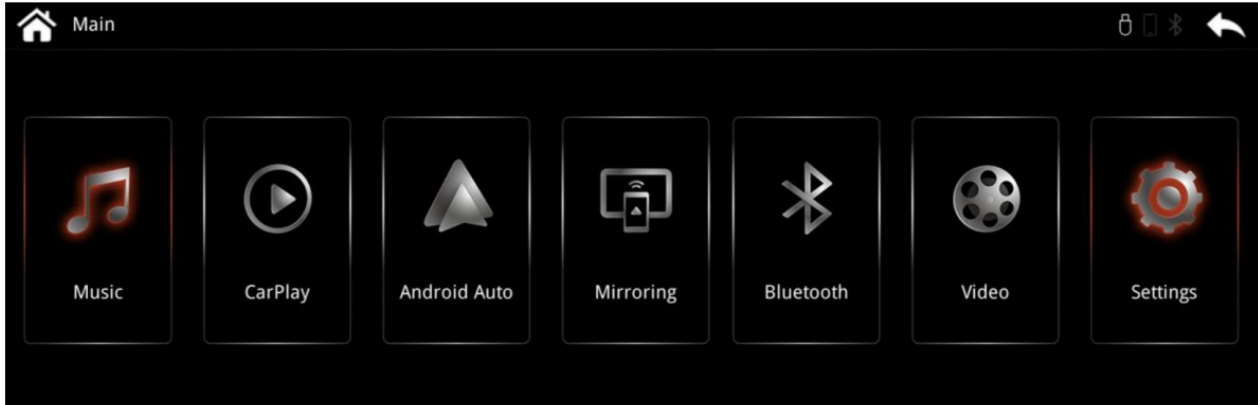

- Mr12volt interface emulates CD changer function of a Audi MMI radio and is connected through MOST bus of its function. once successfully installed, Mr12volt appears in CD7. (Picture illustrated above)
- No coding is needed regardless of the MMI software version. And it works With or Without a CD changer,
- Note that it does not work on MMI 2G Basic radio (Red & Black Display)

DIP SWITCH CONFIGURATION

262GMD	DIP.1	DIP.2	DIP.3	DIP.4	DIP.5
A6/A8 (a)	OFF	OFF	OFF	OFF	ON

A4/A5 (b)	OFF	OFF	OFF	ON	OFF

Product Features

- CarPlay
- Android Auto
- Mirroring
- Music & Video Playback (Through USB Flash)
- Bluetooth HF & Music Streaming
- Reverse Camera Input (Support up to AHD720P)
- Front Camera Input
- Passenger Side L/R Camera Input (For the use of Blind Spot)
- Reverse Grid Line
- Software Update available

Main Feature Operations

CarPlay/Android Auto

- Support both Wired and Wireless CarPlay Connection
- To connect to CarPlay Wirelessly, both Bluetooth and Wi-Fi connection are required
- For Wired CarPlay & Android Auto : Use Genuine cable to connect through the USB connector. Both Wi-Fi & Bluetooth connections are NOT required in this case.
 - How to Connect CarPlay : Search for Mr12volt_ xxxx and Pair to make a Bluetooth connection —> Turn on Wi-Fi and & Use CarPlay —> it will start CarPlay on your screen after few seconds, it could take longer for first time connection
 - How to Connect Android Auto : Search for MR12volt_ xxx and Pair to make a Bluetooth connection, Wi-Fi on phone will be on automatically and connected to Android Auto

Mirroring

iPhone

1. Disable CarPlay by turning off Bluetooth & Wi Fi Connection
2. Enter Mirroring menu on Car display and Choose iPhone
3. Turn on Wi-Fi on phone connect network "carplay_xxxx" (PW is 88888888)
4. Go to Apple quick menu bar, select Screen Mirroring and select Mirroring again
5. Phone display will appear on Car Display now

Android Phone

- It is necessary to install "MLink" application on your Android phone, it can be downloaded on www.mr12volt.com (Go to SUPPORT —> Download —> P2000 mirroring)

- Both Bluetooth & Hotspot connection are needed at all time for mirroring
 - **Hotspot Setting :**
 1. 5GHz band must be selected
 2. Enter Mirroring menu on Car display and Choose "Android"
 3. Network name & Password on phone must be set same as shown on Mr12volt "Mirroring" menu
 4. Open MLink app—>turn on Bluetooth and Hotspot

5. When both Bluetooth and Hotspot are successfully connected, Phone display will appear on Car Display
- It is always best to open mirroring menu on car display prior to the connection of Bluetooth, so that Android Auto does not overtake the function of mirroring when first connected to Bluetooth

Bluetooth

- Phone contact list
- Contact history
- Dial Pad
- Audio Streaming

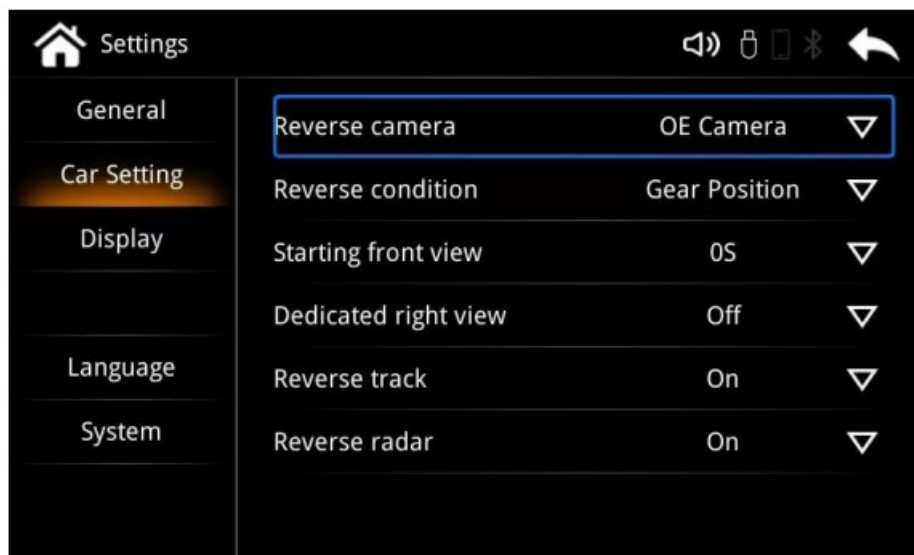

BT Hands-free

- When a call is received, answer and reject button will appear on display, use MMI/i-Drive/Rotary button to select.
- Audi factory Bluetooth HF and Mr12volt Bluetooth can be connected at the same time. (see below picture)
When both are connected and a call is received, Audi HF will take over Mr12volt HF and it can be answered through phone button on steering wheel.

- Mr12volt Does not support the integration of OEM microphone even with the installation of a Y-cable. if you need to use Mr12volt HF or Voice Command such as SIRI, the 3.5mm jack microphone supplied in the package must be installed.

Car Settings

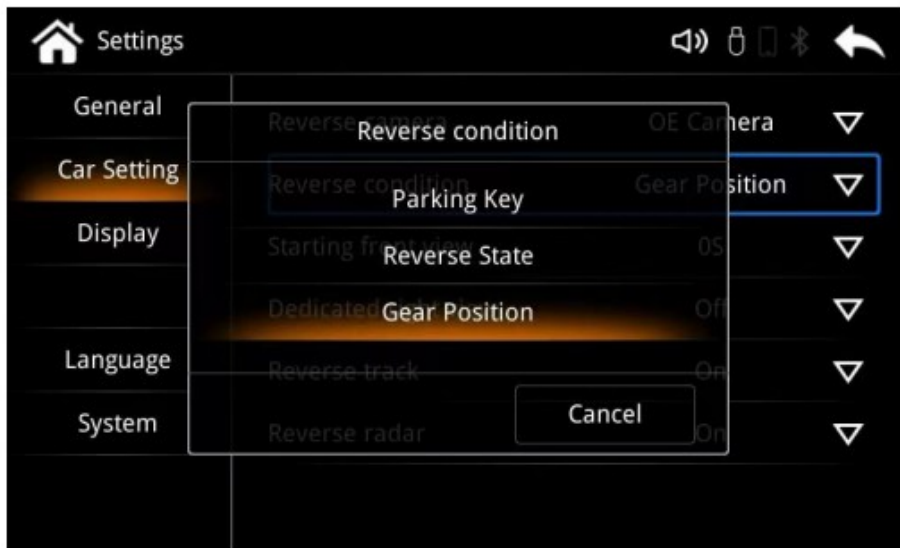

“Reverse Camera” settings

- OE Camera (Default) – Select this when car is fitted with factory camera
- AfterMarket 360 – Select this when car is installed with a aftermarket camera (support up to AHD720 only)

“Reverse condition” settings

- Gear Position (Default) – Detects through CAN bus when reverse.
- Reverse state – Detects through 12v reverse light signal when reverse (requires the manual wiring connection of a car reverse signal)

When do i select “Reverse State” ?

Mr12volt detects Car CAN bus with most of the car models in the market, however in some cases particularly in older generation cars, when a CAN bus can't be detected, it is necessary to manually detect camera through car reverse light signal.

(Refer to the AUDI MMI 2G Installation Diagram for more details)

“Starting front view” – Front Camera timer setting with 5s, 10s, 30s

“Dedicated right view” – L/R Side camera setting (Blind Spot camera)

- Can Active – Detects through CanBus
- 12v Active – Detects through 12v side L/R light

“Reverse track” – Option to turn ON or OFF of a Parking Grid (For AfterMarket camera only)

“Reverse radar” – Option to turn ON or OFF of a Reverse Sensor (For AfterMarket Reverse sensor only)

USB Supported Formats & Other Specs

Music and Video Playback File Format

- USB file File Format FAT12, FAT32
- Support USB2.0 , Hard disk memory
- Supported music format : MP3, WMA, AAC, AC3, DTS, OGG, FLAC, APE, AMR
- Supported video format : mkv, mp4, avi, wmv, rmvb, rm, mpg, mpeg, ts, dat, asf, flv, vob
- Supported Photo format : BMP, JPG, GIF, PNG
- DOES NOT support folder management when browsing USB Music and Video files

Other Data
