Prestige A11SC-025IT Computer Portatile

Product Information

The F3 Hotkey Recovery Function is a system recovery function that can be used on MSI notebook computers. It is designed to help users recover their system in the event of non-recoverable problems with their hard drive or system. Before using the F3 Hotkey Recovery Function, it is recommended to backup important data saved on the system drive to other storage devices.

Product Usage

To use the F3 Hotkey Recovery Function, follow the instructions below:

1. Restart the notebook.
2. Press the F3 hotkey on the keyboard promptly when the MSI greeting appears on the display.
3. On the Choose an Option screen, tap Troubleshoot.
4. On the Troubleshoot screen, tap Restore MSI factory to reset the system to the default settings.
5. On the RECOVERY SYSTEM screen, tap System Partition Recovery.
6. Follow the on-screen instructions to continue and complete the Recovery Function.

Note: The F3 Hotkey Recovery Function should only be used if your hard drive and system have encountered non-recoverable problems.

Precautions for Using the System Recovery Function

1. If your hard drive and system encountered non-recoverable problems, please use the F3 Hotkey recovery from the Hard Drive first to perform the System Recover Function.
2. Before using the System Recovery Function, please backup the important data saved on your system drive to other storage devices.

Recovering the system with the F3 Hotkey

Follow the instructions below to continue:

1. Restart the notebook.
2. Press the F3 hotkey on the keyboard promptly when the MSI greeting appears on the display.
3. On the "Choose an Option" screen, tap "Troubleshoot".
4. On the "Troubleshoot" screen, tap "Restore MSI factory" to reset the system to the default settings.
5. On the "RECOVERY SYSTEM" screen, tap "System Partition Recovery".
6. Follow the on-screen instructions to continue and complete the Recovery Function.
