## COMPATIBILITY

Smartphones, tablets, eReaders, GPS and other USB devices

## PACKAGE CONTENTS

- myCharge RAZORMAX
- Micro-USB Recharging Cable
- Quickstart Guide

## RAZORMAX

### WELCOME!

Congratulations, you're now the proud owner of the myCharge RAZORMAX! This powerbank was designed with your on-the-go charging needs in mind and is compatible with virtually all USB devices.

The portable powerbank's 6000mAh battery capacity guarantees that your device can stay charged and connected wherever your travels may take you.

## PRODUCT SPECS

- Battery Capacity: High Density 6000mAh Battery
- Micro-USB Input: 5VDC, 0.7A-2.1A
- USB Output: 5VDC, 2.4A Max
- Dimensions: 4.4 x 2.6 x 0.5 inches
- Weight: 0.38 lbs.

## HELPFUL TIP

## PRODUCT TECHNOLOGIES

Your new powerbank is built with these technologies to give you the fastest, safest, and smartest user experience possible:

	<b>MULTI~CHARGE</b> Charges two devices simultaneously
	<b>SMARTSENSE™</b> Detects the connected device and charges it at the maximum speed allowed by the device , shortening charge time
	<b>PEAK POWER™</b> Provides faster recharge of the RAZORPLUS as it maximizes the amount of available power going into the powerbank
	<b>PASS~THROUGH CHARGING</b> Charges the powerbank and the device in parallel. You'll have both charged for extra power when you need it
	<b>BATTERY PROTECTION</b> Protects the powerbank and your device against overcharging, undercharging, overtemperature, overcurrent and short circuit for your safety
	<b>HIGH EFFICIENCY</b> Maximizes power to your device by minimizing the loss of energy delivered, keeping you powered longer
	<b>HIGH DENSITY BATTERY</b> Increases run-time between charges and makes the RAZORPLUS compact and lightweight

## CHARGING DEVICES USING YOUR RAZORMAX

If your device is charged through a micro-USB port, feel free to use the recharging cable provided, otherwise use your own device's cable to charge it. When the device is plugged in, the RAZORMAX will continue to charge it

until it is unplugged or runs out of power. With SmartSense™ technology, your RAZORMAX is compatible with just about any device on the market – smartphones, tablets, eReaders, GPS and more. It senses what device it's plugged into and provides the maximum power allowed, giving you the benefit of faster charging. The 2.4A output is shared across both USB ports so you can connect high-powered devices to either port. The RAZORMAX's high efficiency technology minimizes energy loss from the input source to the powerbank and from the powerbank to the device.

## RECHARGING YOUR RAZORMAX

Connect the included recharging cable to your RAZORMAX and to a power source – wall, computer, or car. Your RAZORMAX is built with Peak Power™ technology that maximizes the amount of available power going into your charger so you can rest assured that it's recharging at the fastest rate allowed by the power source.

Your RAZORMAX has pass-through charging, allowing you to charge both the powerbank and your device simultaneously.

As your RAZORMAX recharges, the LEDs will illuminate to indicate the battery level. A fully charged unit shows 4 solid, non-blinking LEDs. It is normal for your RAZORMAX to be warm to the touch while in use.

## CHECKING BATTERY LEVEL

Your RAZORMAX contains high density batteries, allowing for the powerbank to remain small and powerful for ultimate portability. To check the battery level, shake the powerbank. The LEDs will illuminate to show you how much battery life remains – 4 solid LEDs mean your RAZORMAX is fully charged and 1 LED means that it's almost empty.

If you see 1 LED blinking, this means you have less than 5% remaining and should recharge.

## FAQ/TROUBLESHOOTING

### Which port charges my RAZORMAX and which charges my device?

The small micro-USB port is used to recharge your RAZORMAX (recharge cable included). The larger USB ports are used for charging your devices with your own cable(s).

### Will my RAZORMAX charge any smartphone?

Your RAZORMAX is fully compatible with virtually all smartphones. The powerbank will identify which device is connected through its SmartSense™ technology.

### Will my RAZORMAX charge any other devices?

Yes, the RAZORMAX is built with a 2.4A output shared across two ports. This allows high-powered devices to be charged including tablets, eReaders, GPS and more.

### **What can I use to charge my RAZORMAX?**

You can recharge your RAZORMAX by connecting it to any USB port through the recharging cable provided. For maximum charging speed connect to a wall USB adapter or car outlet.

### **What should I do if my device doesn't charge?**

Shake your RAZORMAX to initiate charging and to check battery level. It is possible that there is simply not enough power to charge your device, recharge your RAZORMAX if needed. If your device still isn't charging, check that the charging cable is properly connected to the USB port and to your device.

### **What should I do if all 4 LEDS are flashing?**

If your powerbank is recharging, this is normal. If you see all 4 LEDs flash for 10 seconds, both devices combined draw more power than the RAZORMAX can give (max 2.4A output shared across two ports) and the USB port will shut off. Try unplugging one of the devices.

### **Why are some LED lights solid and some flashing when I charge the RAZORMAX?**

The solid LEDs tell you how much the powerbank is currently charged, while the flashing LEDs indicate how much is left to charge. Your RAZORMAX is fully charged when all 4 LEDs are solid.

### **Can I charge my device(s) and the RAZORMAX at the same time?**

Yes! The RAZORMAX has pass-through charging technology, which means you can simultaneously charge your device(s) alongside the RAZORMAX rather than charging each separately.

### **How many charge cycles do I get with the RAZORMAX?**

From empty to full, the RAZORMAX is capable of recharging at least 500 times! Count on your myCharge to keep you going.

## **WARRANTY INFORMATION**

We are dedicated to making the highest quality products possible. In that, we provide a one-year limited warranty from the date of purchase. Keep a copy of your purchase receipt as proof of purchase and register your product at [mycharge.com](http://mycharge.com) to activate it and check for the latest product updates as they develop. Failure to register your product and/or to provide proof of purchase may void the warranty.

RFA Brands, LLC sells its products with the intent that they are free of defects in manufacture and workmanship for a period of one year from the date of original purchase, except as noted in our policy. RFA Brands, LLC warrants that its products will be free of defects in material and workmanship under normal use and service. This warranty extends only to consumers and does not extend to Retailers.

To obtain warranty service on your product, please visit [mycharge.com/pages/support](http://mycharge.com/pages/support)
