Other functions	
WPS	Press and hold the on/off button for 3-5 seconds until the LED flashes white slowly.
Reset	Press and hold the on/off button for 10 seconds until the LED flashes white quickly.

FAQ & Support

WiFi Switch Zero not working?

Restart the WiFi Switch Zero

Simply unplug and plug it in again.

Plug the WiFi Switch Zero close to your DSL Router

If the LED lights up in white, the WiFi Switch Zero works perfectly and could have suffered from a weak WiFi signal in its previous location.

Reconnect the WiFi Switch Zero

Activate WPS first on your Router, then on your WiFi Switch Zero.
