8 M4.2*15mm Screw	8
9 Allen Key	1
10 Flat Washer	8
11 Spring Washer	8
12 Foot Pad	4

The goods

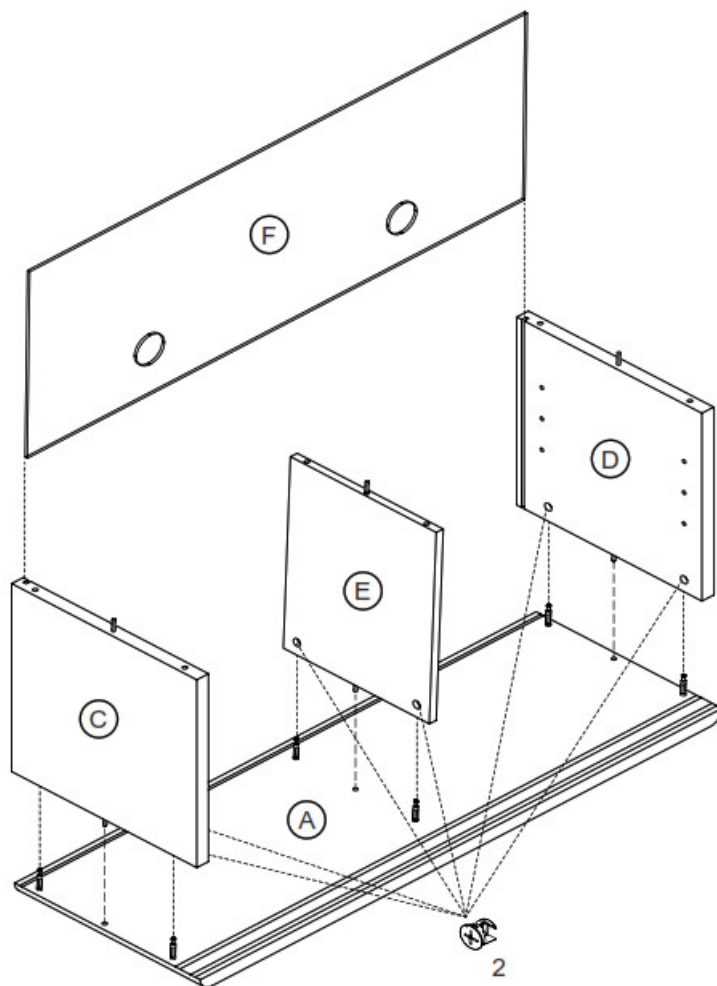

Step 1

How much wood could a woodchuck chuck?...I apologize, please insert wooden dowels into side panels and screw in the cam bolts (1) to the Top Panel (A).

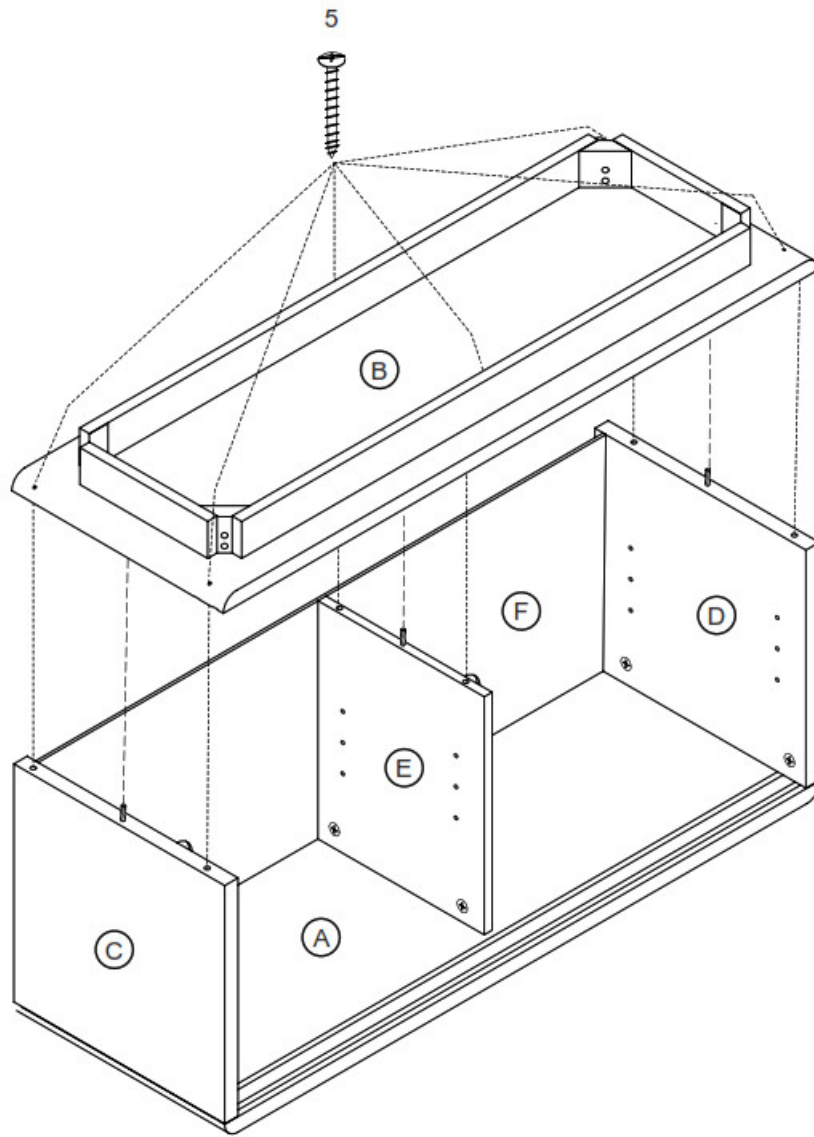

Step 2

Let's get the shelves set up, you're doing great!

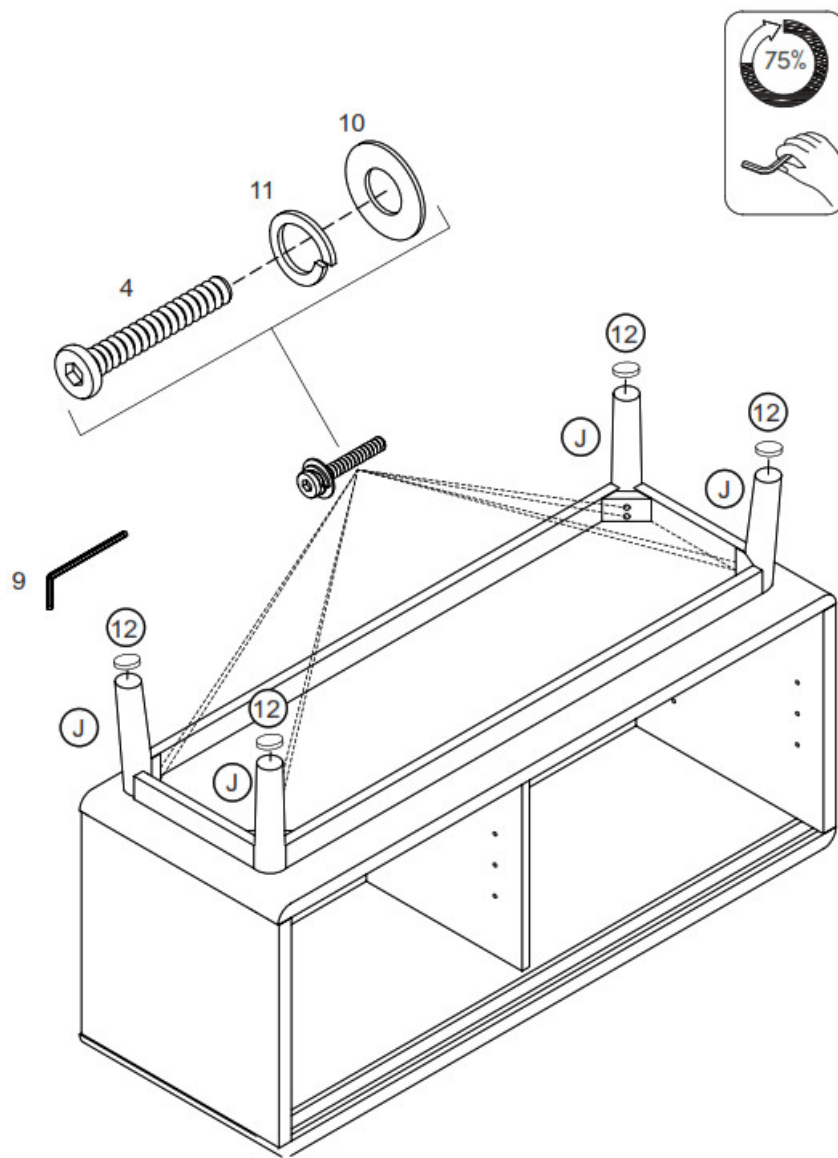

Step 3

If you couldn't tell by now, you've been building it upside down. Time to attach the Bottom Unit (B).

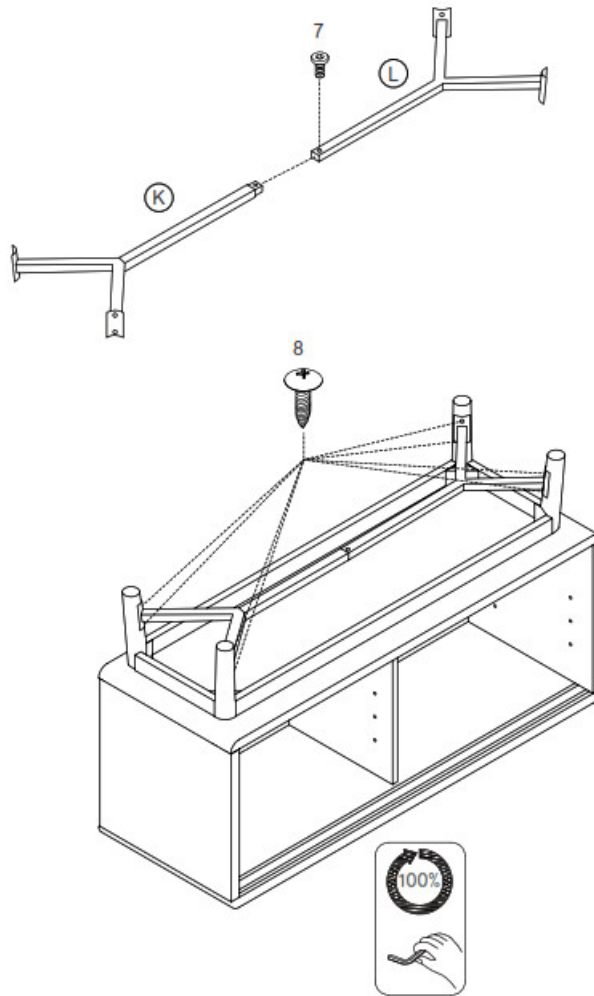

Step 4

Let's get those legs and foot pads secured! You know what they say, never skip leg day!

Step 5

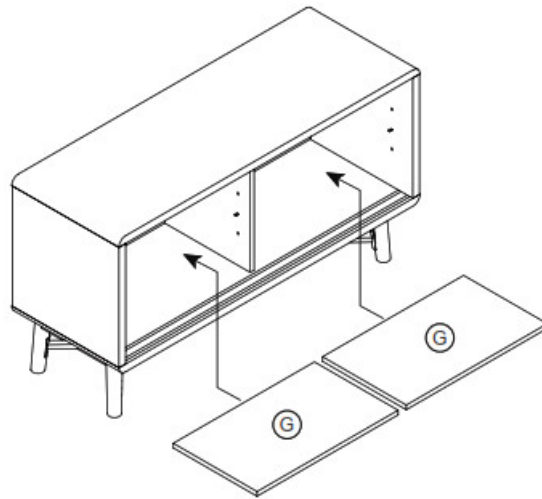

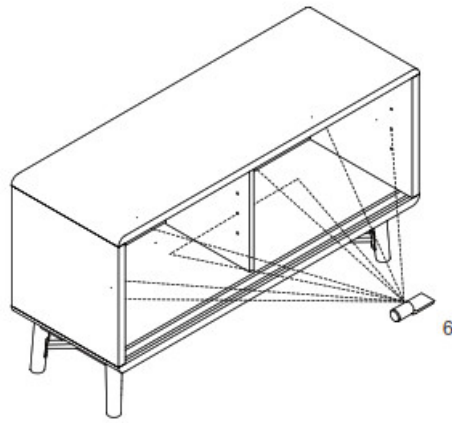

Securely attach the metal stretchers.

Once Step 5 is complete, you can go back and tighten all the bolts from the previous steps!

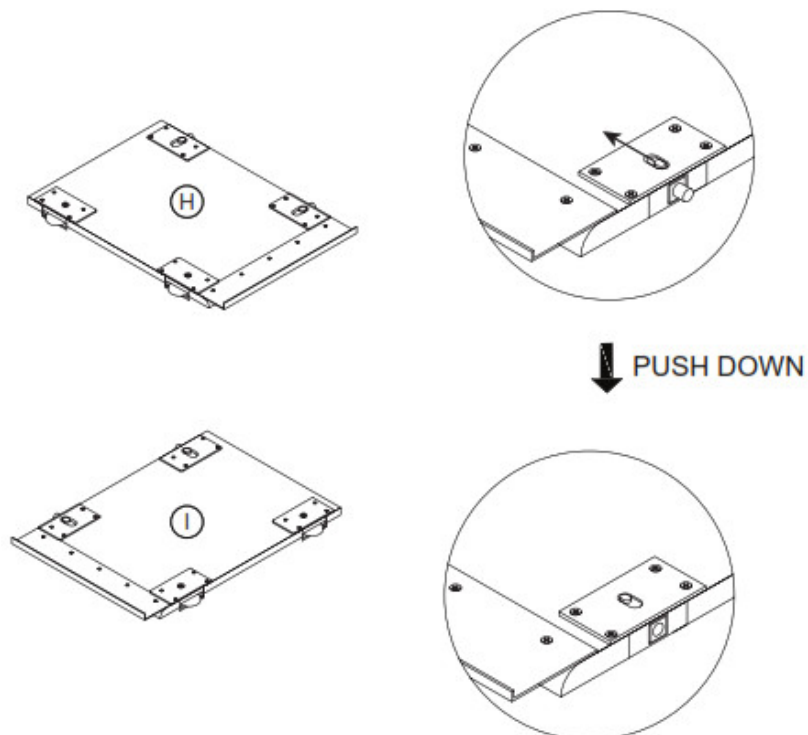

Step 6

You're over halfway done! Carefully flip the storage unit over and tighten the shelf pins (6) where you want your shelves to rest.

Step 7

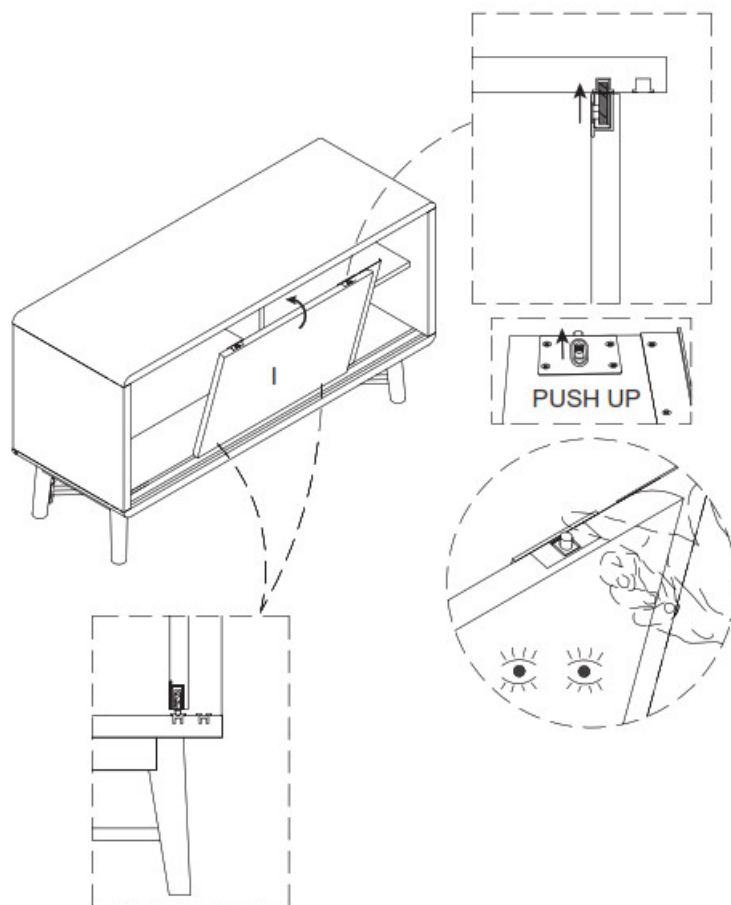

Grab the doors (H) and (I) and push down on the side latches on each door to prepare them to get ready to be put on the unit.

Step 8

Line up door panel's hardware with the guide tracks on the top & bottom panels.

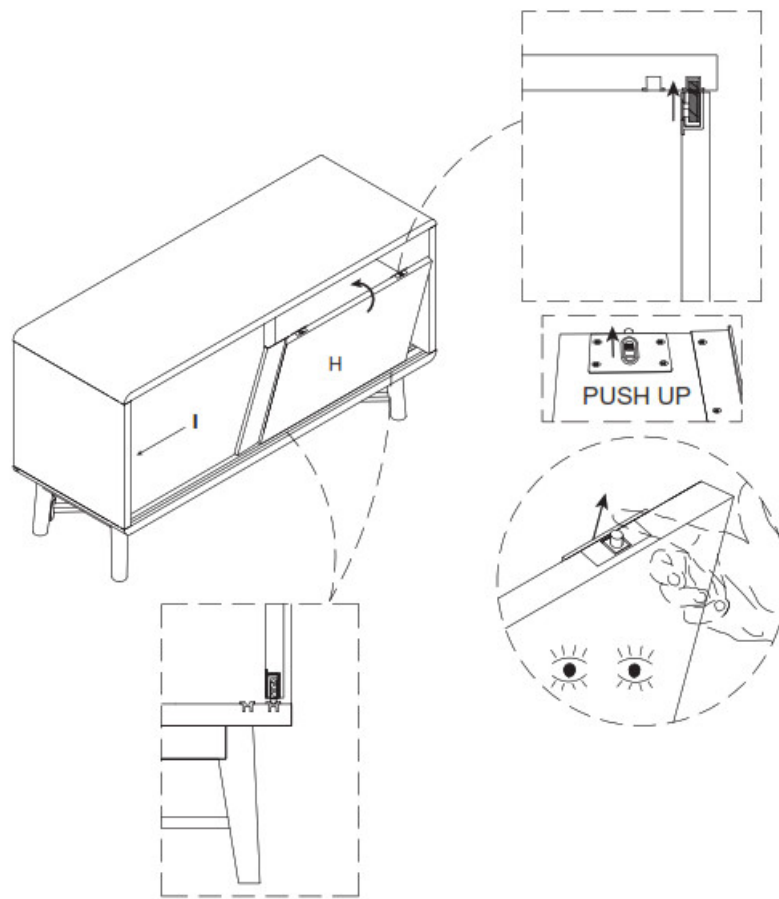

Then push up on the hardware on the back of the panel to set the panel in place.

Step 9

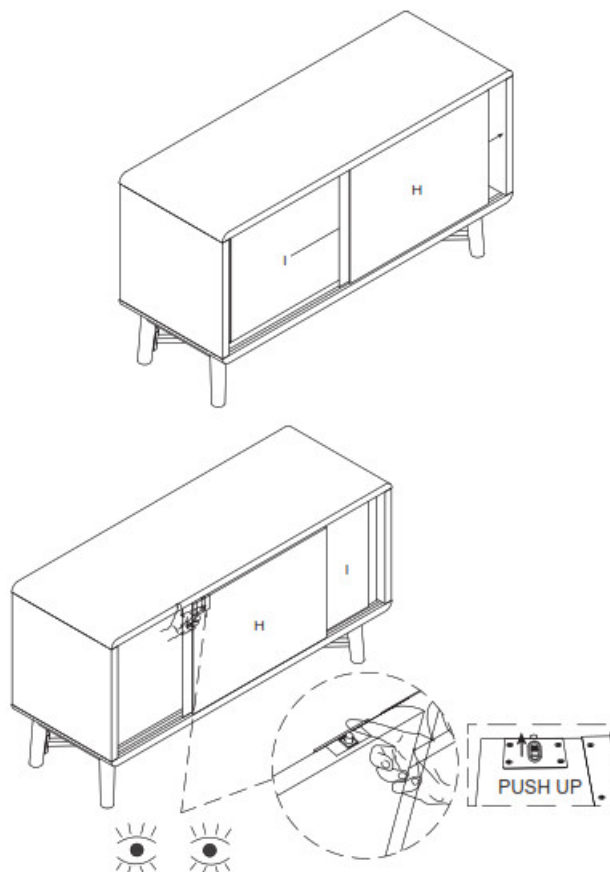

Before installing the Right Door (H), move the Left Door (I) all the way to the left.

Next line up door panel's hardware with the guide tracks on the top & bottom panels. Then, push up on the hardware on the back of the panel to set the panel in place.

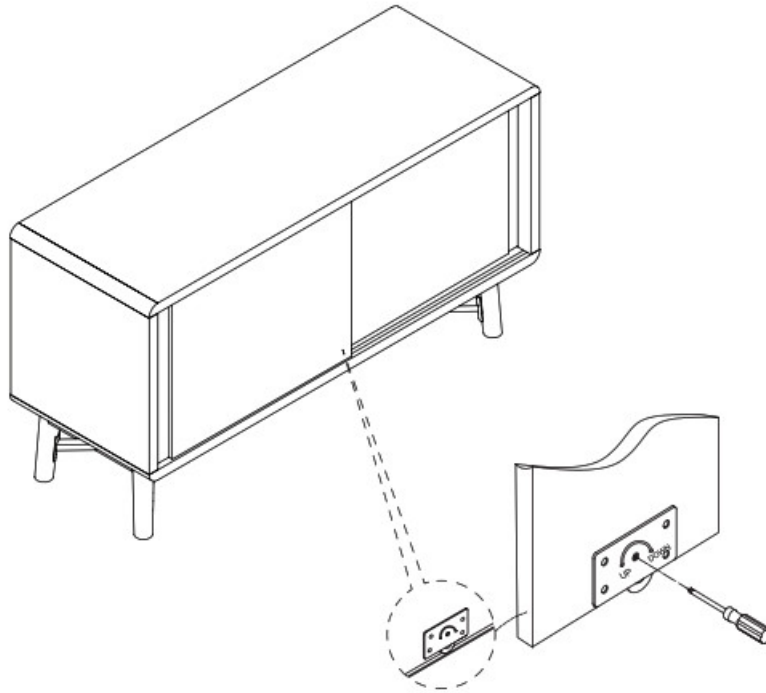

Step 9 cont.

In order to finish setting the Right Door (H) in place, slide the Left Door (I) all the way to the right to be able to access the hardware on the back of the panel to set the panel in place.

Step 10

Ta-da! We are so proud of you! Chip and Joanna Gaines would be, too. Is it time for pizza??

**Helpful Tip:**

If you are experiencing issues with your doors not gliding easily or falling out of the track, you can simply adjust the height of the rollers with a screwdriver for a better, smoother fit.
