Nautilus P3 RV Water Management System

Specifications:

- **Model:** Nautilus P3
- **Type:** RV Water Management System
- **Year:** June 2024

Product Information:

The Nautilus P3 RV Water Management System is designed to provide efficient water management solutions for recreational vehicles. It offers control panel functionality and various flow diagrams for typical water management configurations.

Product Usage Instructions

- **Installation:**

Follow the Nautilus P3 Installation Instructions provided in the manual to set up the system correctly in your RV.

- **Control Panel Functions:**

The Nautilus P3 Control Panel allows users to monitor and control the water management system efficiently.

Familiarize yourself with the functions mentioned in the manual for optimal usage.

- **Water Flow Diagrams:**

Refer to the flow diagrams provided in the manual for typical water management configurations. These diagrams help in understanding how water flows within the system.

Disclaimer

The diagrams provided herein are based on manufacturer manuals and other publicly available information. While every effort has been made to ensure accuracy, the information is provided “as is” without guarantees of completeness, accuracy, or timeliness. Users are advised to verify details independently and consult original manufacturer manuals for the most accurate and up-to-date information. NüCamp and B&B Molders have neither reviewed nor directly contributed to the contents.

Purpose & Prior Work

The information in this document is intended to be used by owners of 2024 nūCamp RV T@B 320S and T@B 320 CS teardrop campers. Certain information may be applicable, at least in part, to some of the more recent but earlier model years of these T@B 320 campers. It intended to provide a set of simplistic graphic illustrations of how fluids are routed when the Nautilus is set to a particular configuration using the colored valve control handles. A flow diagram is provided for each of the principal functions performed by the Nautilus P3 control panel. This document is intended to augment the excellent work done by others in the T@B community, including @TomCanada and @MuttonChops in the <https://Tab-rv.vanillacommunity.com> forum. A link to a comprehensive “Water Flow Overview” document created by @MuttonChops is provided [here](#) for reference

The Nautilus P3 Control Panel

Nautilus P3 Handle Position and Valve Routing Information	
<p>WHITE HANDLE: Receives water from water inlet on front of panel</p> <p>Sideways - water goes to pump inlet</p> <p>Down – water goes into blue handled diverter</p>	 
<p>BLUE HANDLE: Receives water from the white handle valve/water inlet on front of panel</p> <p>Sideways - water goes to fixtures (cold)</p> <p>Down – water will go to or come from fresh water tank</p>	 
<p>GREEN HANDLE: Is an on/off flow through valve that feeds pump from fresh water tank</p> <p>Sideways - water will not flow through valve</p> <p>Up – water will go to or come from fresh water tank</p>	 
<p>RED HANDLE: Receives water from cold water supply line</p> <p>Sideways - water goes to hot water fixtures without going through hot water heater</p> <p>Up – water goes to hot water heater</p>
