NAVTOOL IR Remote HDMI Interface User Manual

Contents

NAVTOOL IR Remote HDMI Interface

Product Information

The IR Remote User Manual is designed and manufactured by NavTool.com. This product is compatible with an HDMI interface and allows users to control the interface from a distance using an IR remote. All product names, logos, brands, trademarks, and registered trademarks are the property of their respective owners.

## Product Usage Instructions

1. Set the vehicle's radio to AUX or an alternative AUX input device. Interface audio will not play through car speakers if AUX is not connected or the radio is not set to AUX input.
2. Aim the remote at the IR receiver and press the power button to turn on and off the interface. If the interface is not displaying on the screen please check that the led in the left arrow on the remote lights up when pressing any button. If it does not light up, check and replace the batteries as needed.
3. Use the following buttons on the IR remote for navigation:
   - Power: Turns the interface ON/OFF
   - Back: Not Applicable
   - Left / Right: Navigate the interface
   - Up / Down: Not Applicable
   - OK: Enter/Select button
   - Voice: Not Applicable
   - Menu: Returns to the bottom interface menu bar after selecting HDMI or Camera Inputs
4. To access HDMI input:
   - Press the Right button on the IR remote to navigate to HDMI.
   - Select HDMI by pressing the OK button. This will display the HDMI input of the HDMI device you connected to the interface.
   - Press the Menu button to return to the bottom menu bar.
   - If no HDMI device is connected, you will get a No Signal HDMIpop up message. Press the OK button to exit the pop-up.
