Netool io Pro2 App

Product Information

The Netool.io Pro2 is a network analysis tool that allows for easy troubleshooting and maintenance of network connectivity issues. It is designed to be portable and easy to use, making it a great addition to any IT professional's toolkit.

Product Features

- Easy to use interface
- Portable design
- WiFi and Ethernet connectivity options
- Can be used for network analysis and troubleshooting
- Supports WPA2 encryption for secure connections
- Comes with a 12-month warranty from the date of purchase

Product Usage

Follow these steps to start using your Netool.io Pro2:

1. Navigate to <https://netool.io/app> (or scan the QR code) to download the Netool.io Pro app.
2. Turn on your Netool by holding down the power button for five seconds. Once the blue light is solid your Netool is ready.
3. Go to your phone's settings and connect to Netool Pro's WiFi access point. By default, your Netool will have a WiFi SSID of NetoolPro-XXXX.
4. Start the Netool.io Pro app. Tap on the devices menu icon. Click on your Netool's Name to connect.
5. Plug your netool.io Pro into an ethernet port and start analyzing your network!

To secure your Netool.io Pro2, follow these steps:

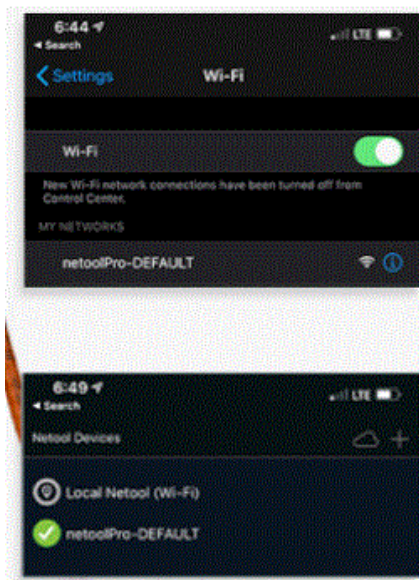

1. Once connected to your Netool.io Pro, navigate to the settings menu.
2. Open the Ethernet port menu.
3. Turn off management over LAN toggle, then tap on apply to save the changes.
4. Go back to the settings menu then open WiFi menu.
5. Enable WPA2 encryption and enter a WPA2 Key into the input field, then tap on apply to save the changes.
6. Now reconnect to your Netool.io Pro's WiFi and use the WPA2 key you entered in step 5.

Remember to properly dispose of your Netool.io Pro2 and its accessories in accordance with local regulations. For more information and support, contact NetPeppers GmbH:
