NEWYES AB0606 Notepad Calculator

Safety Precautions

Battery

- This product is not a children's toy, and it is recommended to be used by people above 6 years old.
- It is strictly forbidden to heat the whole product or battery, or place them in water or fire.

Operation Precautions

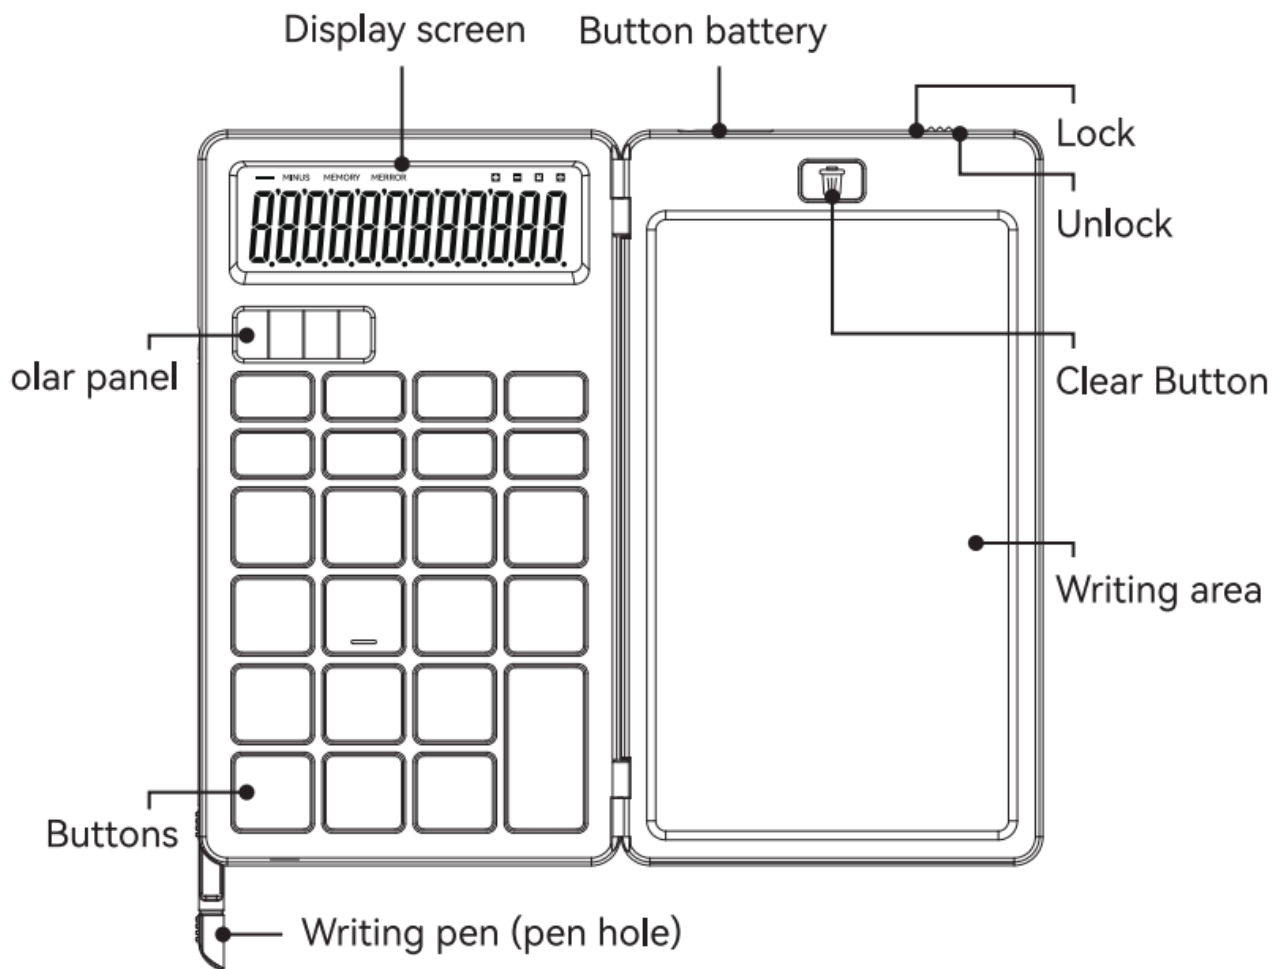

- When the screen of the calculator is dim, and the battery is obviously insufficient, you can unfold the product and place it flat under the sun or a fluorescent lamp. When the light source environment reaches 200Lux or above (household fluorescent lamps are generally 20-40 watts, and the light source environment can reach 200Lux or above), it can provide a normal power supply for the calculator.
- When the notepad can't be cleared, please check whether the anti-clearing lock key is in the locked state or not, if so, please turn it to the unlocked state. After the operation, if it still can't be cleared, please replace the button battery.
- This product is equipped with a button battery, when replaced the battery, it is strictly forbidden for children under 14 to do it to avoid accidental ingestion of the button battery.
- Do not use or store this product in areas with high temperature, high humidity, or excessive dust.

- Do not excessively impact, squeeze, or bend the calculator and handwriting board.
- Please use a soft and dry cloth to clean the exterior of the product, the LCD screen, and the notepad. Do not use hard objects other than the stylus pen to avoid scratching the LCD film, and do not use excessive force when writing.
- Whenever you discard this product or the lithium battery inside, please make sure to comply with local laws and regulations.

Product parameters

Product name	Notepad Calculator
Product size	15.3cm*9.0cm*1.6cm
Product net weight	About 141g
Working temperature	-10°C-40°C
Battery type	Button battery
Battery model	CR1220
Battery life	More than 1 year
Writing force	150-300g
Calculator display digits	12 digits
Calculator power supply	Solar panel and button battery
Writing board life	More than 50,000 times

Product Structure Diagram

Product Usage

- Simple arithmetic;
- Record the calculation process and results, you can record while calculating.
- It can be used in places such as home, school, shopping mall, and office.

Instructions for use

Button Introduction

- ON/AC: press this button to turn on the calculator or to clear all the values saved in the calculator;
- M+: save the currently displayed value in the memory and interrupts the input of digits;
- M- : subtract the currently displayed value from the memory content and interrupt the input of digits;
- MRC: press the button for the first time to recall the memory content and clear the memory content when pressing it for the second time;
- ►: The backspace button clears the last digit of the number displayed on the LCD

screen;

- $\sqrt{\quad}$: display the square root of a positive number input. (The square root) ;
- %: Percent;
- 0~9: number buttons, enter the numbers 0-9; . button: decimal point;
- +, -, \times , \div , =: Operation button, addition, subtraction, multiplication, division, etc;

* The maximum number of digits entered on the screen is 12 digits. If the number exceeds 12 digits, an error mark ERROR will be displayed in the front

Calculation Example

Calculation Example	Operation	Screen Display
100+50-30= (-10) \times 20 \div 0.5=	ON/AC 100 \oplus 50 \ominus 30 \equiv \ominus 10 \times 20 \div 0.5 \equiv	0 120 -400
1234567890 \times 66666=	1234567890 \times 66666 \equiv	82.3037029547
$\sqrt{9}\times 5=$	9 $\sqrt{\quad}$ \times 5 \equiv	15
1500 \times 10%= 1500+5%= 1500-5%= 20 \div 500%=	1500 \times 10 % 1500 \oplus 5 % 1500 \ominus 5 % 20 \div 500 %	150 1575 1425 4
368+97+97= 839-47-47-47= $5^{-4} =$ $22.5^3 =$	368 \oplus 97 $\equiv \equiv$ 839 \ominus 47 $\equiv \equiv \equiv$ 5 \div $\equiv \equiv \equiv \equiv$ 22.5 \times $\equiv \equiv$	562 698 0.0016 11390.625
25 \times 5 -) 84 \div 3 +) 68+17 <u> </u> 182	25 \times 5 \equiv M+ 84 \div 3 \equiv M- 68 \oplus 17 \equiv M+ MRC	125 28 85 182
123478+5	123456 $\blacktriangleright\blacktriangleright$ 78 \oplus 5 \equiv	123456 1234 123478 123483

Instructions for Handwriting Board

1. Before usage, please turn on the lock key first (at the top side), then the writing screen

can be cleared by clear key; if the lock key on the locked state, then when press the clear key can't clear the writing screen.

2. When writing on the lcd writing board, pls use the attached stylus pen to write, avoid using the sharp hard objects so as to avoid damaging the product
3. When not using the writing board, pls turn the lock key on the locked state to save battery power.

Product Exception Handling

Phenomena	Countermeasures
The calculator screen display is dim	unfold the product and place it flat under the sun or where the light source environment reaches 200 LUX
The writing screen can't be cleared	please be sure that the lock key is turned to the unlocked state
There are garbled codes during calculation	press ON/AC button
The stylus pen is missing	it can be replaced with other non-sharp hard objects
