Globehopper 3 Nexxiot Mounting App

Download App

Download the Nexxiot Mounting App on your smartphone:

Checklist of What You Need Before Starting:

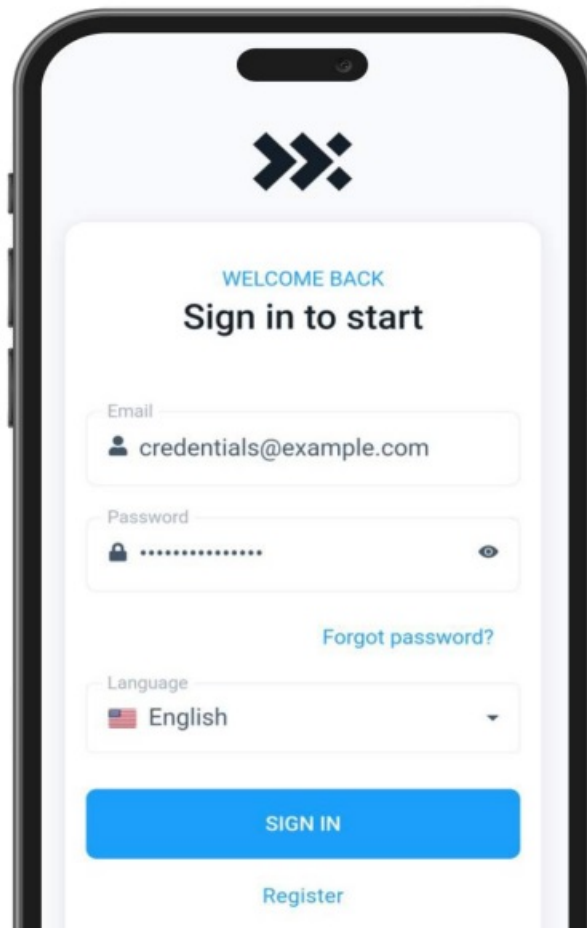

- Always Ensure the Latest Version: Before proceeding, ensure you have the latest version of the Nexxiot Mounting App installed on your phone device.
- Understanding “Mounting”: In this context, “Mounting” refers to the process of digitally associating a Nexxiot

device with an asset.

- Detailed Information and Installation Guidelines: For comprehensive information about the device and detailed installation instructions, please refer to the “Globehopper Crossmodal 3.0 User Manual.”
- For Support and Inquiries: If you need assistance or have any questions regarding device mounting, please contact us via email at support@nexxiot.com.

SET-UP

After downloading the Nexxiot Mounting App, log in using your Nexxiot credentials.

- **Download the application**

Download the application from the App Store (iOS) or Google Play Store (Android).

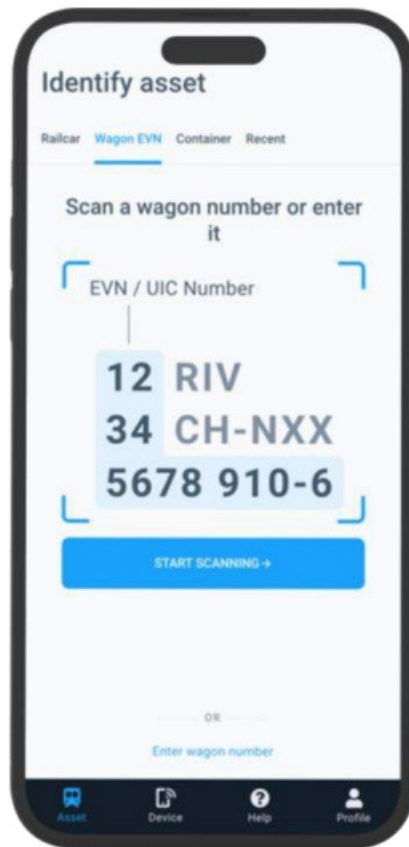

- **Open the application**

Tap on the application to open it and wait for the home screen to appear.

- **Sign in**

Enter your credentials and tap “Sign In.” If you are unsure about your credentials, please contact us.

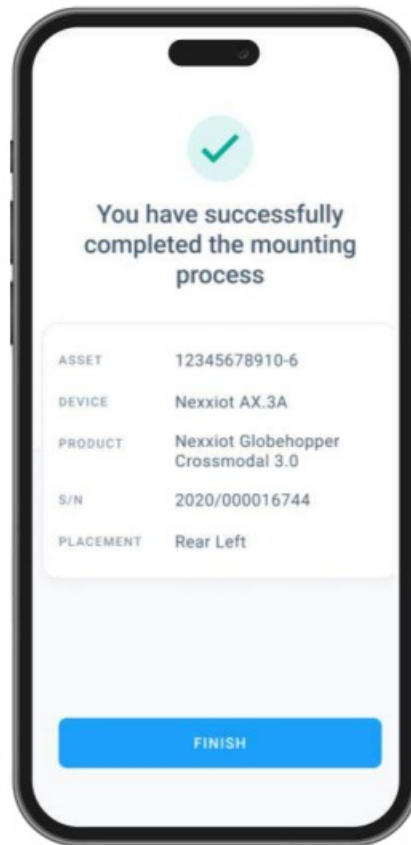

A Globehopper must first be physically mounted to its asset:

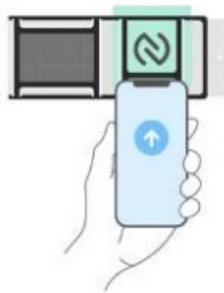

- Wagon EVN: 11-digit number and 1 checksum.
- Tank container: 4 letters and 7 numbers
- Railcar: 3 letters and 5 numbers

Warning: For more flexibility in naming, go to Connect and select the asset type “Other” to remove space and dash.

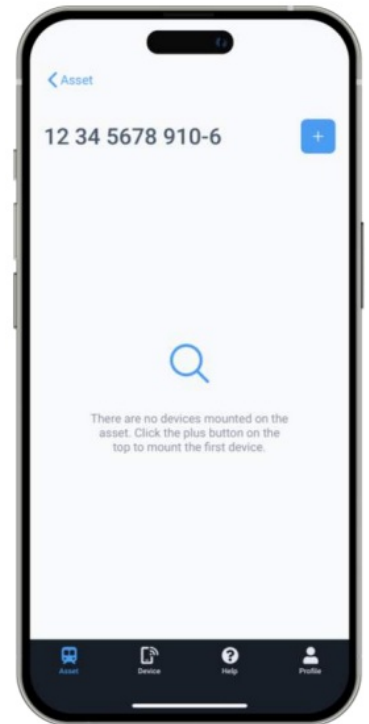

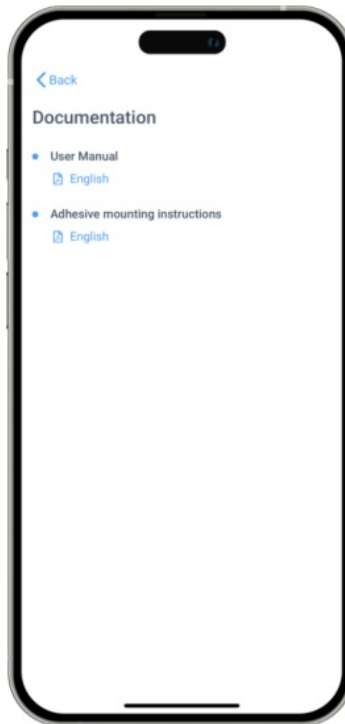

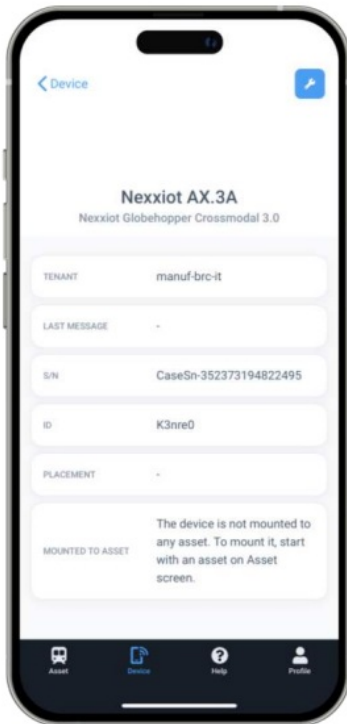

Afterward, the digital mounting can be started using the Mounting App:

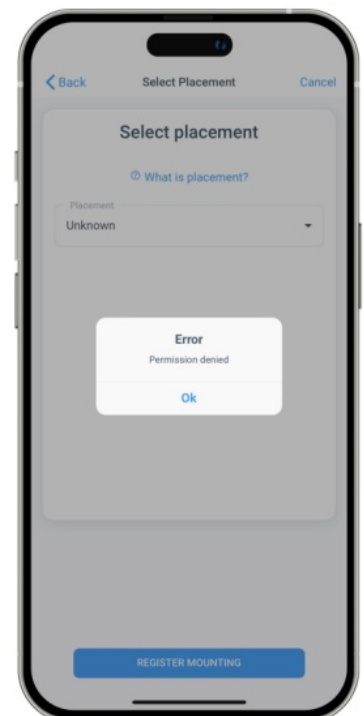

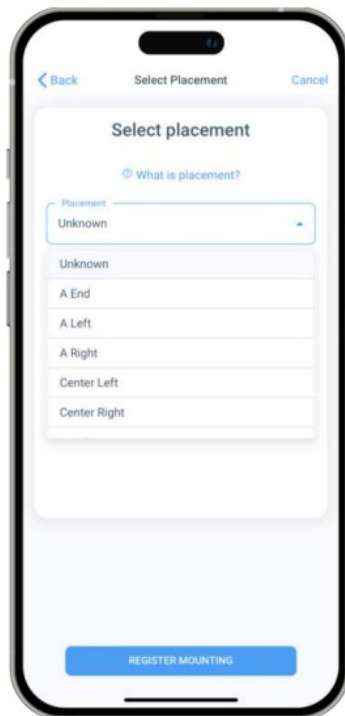

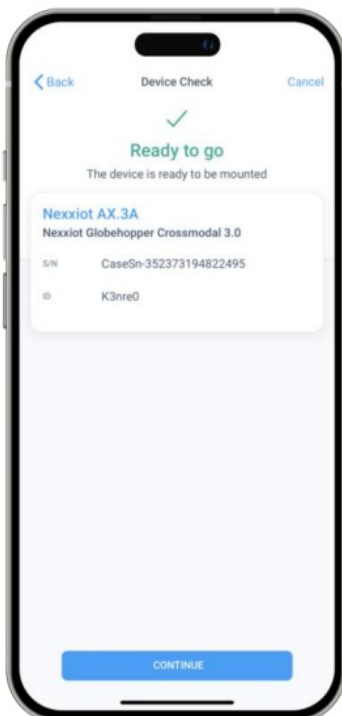

The NFC tag is located under the Nexxiot logo on the Globehopper.

- In the 'Device' tab, you can get a snapshot of a Globehopper by scanning its NFC chip.
- If you require instructions on how to mount a Globehopper to an asset, click on the wrench icon and refer to the user manual.
- Once you are ready, select the 'Asset' tab and add the asset ID.

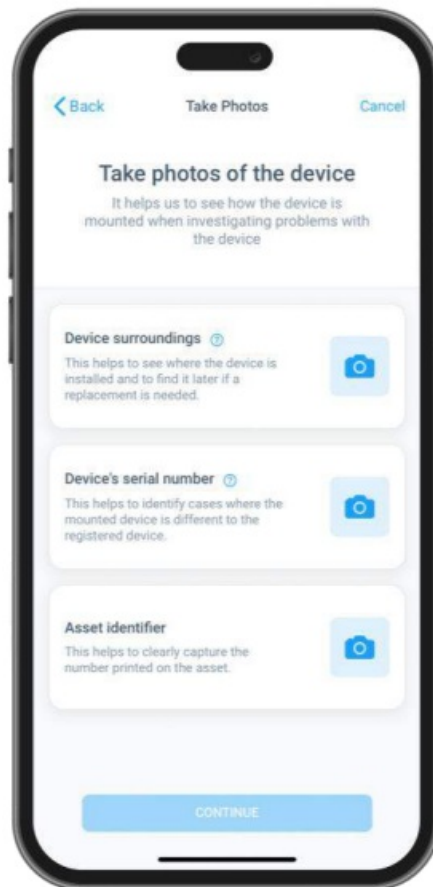

- When a Globehopper has been scanned, it can be mounted.
- Ideally, select the option that best matches the placement of the Globehopper.
- “Permission denied” means you do not have the necessary rights to register the device. Email the support team at support@nexxiot.com, providing the email address used to log in and the device serial number.

As a Final Step, Take Photos of the Device Installed on Your Asset

• Photos

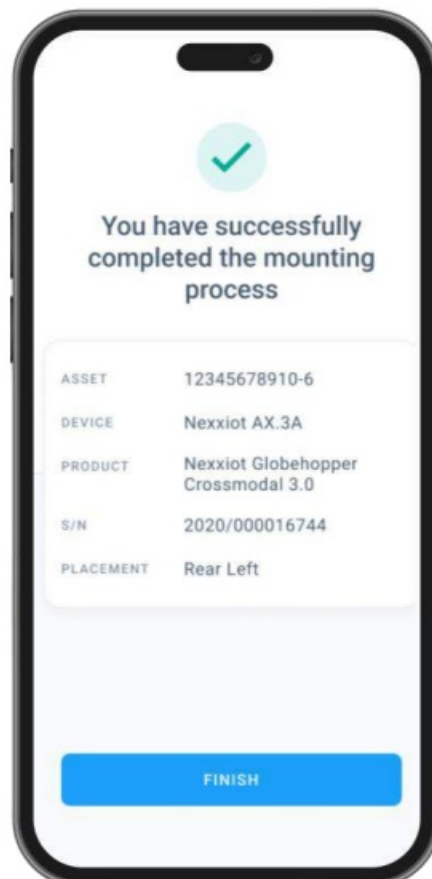

Take a first photo of the device's location.

- Next, take a second photo showing the device's serial number.
- Finally, capture the identifier of your asset.
- Make sure the photos are clear. Once you are finished, click on "Continue".

- **Placement**

Select where the device has been placed.

- Follow up by clicking on "register mounting".

- Upon clicking, you should see a final screen that confirms the mounting of your device.
- You can then proceed to click on “finish”.
