NEXXT SOLUTIONS NHC-0640 Smart Wifi Battery Camera User Guide

SOLUTIONS NHC-0640 Smart Wifi Battery Camera User Guide

**Smart VVi-Fi battery camera
Indoor and outdoor NHc-0640**

User guide
Thank you for purchasing the smart battery-powered Wi-Fi camera from Nexxt Solutions. We are excited about being a part of making your life easier, safer, and bringing peace of mind outside and inside your home.
Contents

Product overview

1. Lens

2. Microphone: picks up the voice of anyone standing near the camera or sound in the surrounding area

3. Status LED indicator light:

LED status	Camera status
White LED on	Camera charging
Red LED on	System starting up
Red LED blinks quickly	Standby for configuration
Red LED blinks quickly	Network pairing
Green LED on	Camera online

4. Light sensor

5. PIR: Passive Infrared sensor that detects heat energy and can differentiate between an animal and a human shape

6. Battery mode on/off switch: On: Turns on battery mode. Off: Turns off battery mode.

7. Built-in microSD™ card slot: supports local storage for a card of up to 128GB

8. Micro USB port: charge the camera's battery through this port. It is recommended to always charge it at 100%. Also provides the alternative to plug the device to an electrical outlet.
   While the camera's battery is charging, the LED light turns on white. Once it is fully charged, the LED light turns off and a notification is received in the Nexxt Home app indicating that the camera's battery is fully charged and ready to be mounted again.

9. Sync button: press and hold this button for 5 seconds to reset the camera

10. Mount base: mounting hole for flexible installation on a wall or a ceiling

Package content

- Smart camera (1)
- Wall mount bracket (1)
- Wall screw set (3)
- USB cable (1)
- Quick setup guide (1)

Inserting the microSD™ card

Gently insert the microSD™ card (up to 128GB) into the slot. The camera will automatically recognize the inserted memory card when it powers on.

Mounting location

First choose the location t o mount the smart camera, preferably one that offers the best viewing angle and wireless reception.
The illustrations below show the optimal field of view o f the camera, when mounted vertically o r horizontally.
Installation
You can place the camera on a shelf or other flat surface, or you can mount it on the wall.

## Mounting your camera on the wall

Select a location to install the camera. The camera should be installed a t least 7 feet above the floor or ground for best motion sensor performance.
Tilt and aim slightly downwards to ensure an effective detection range of up to 26ft away from the mounting location, Place the camera on the wall and secure it using the 3 screws and 3 concrete anchors provided.
You may connect the power to the camera by using the Micro USB power adapter (5V/2A max.)

Installing the Nexxt Home App
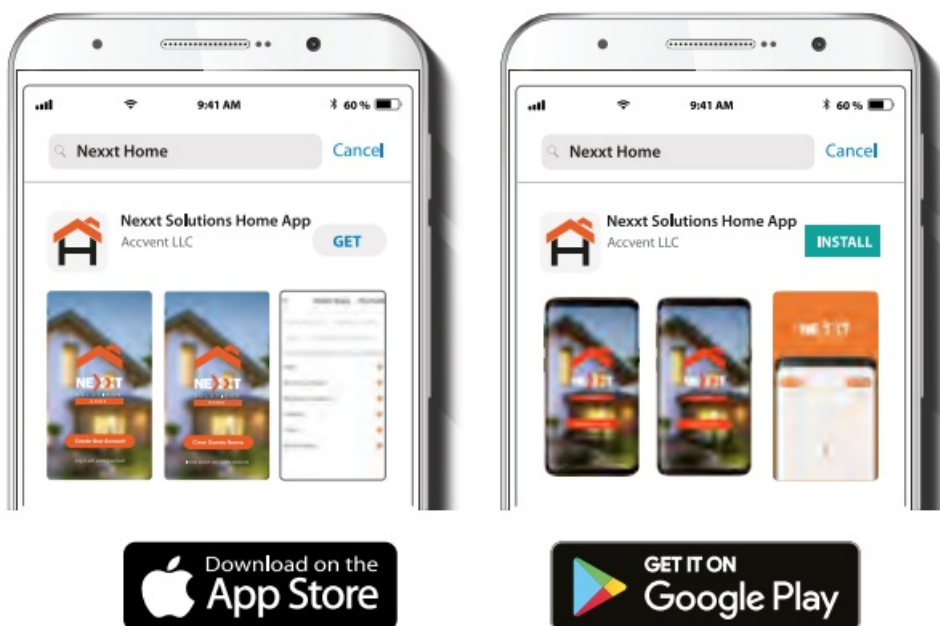

Download the Nexxt Home app from Google Play or Apple App Store and create anewaccount .

Step 1
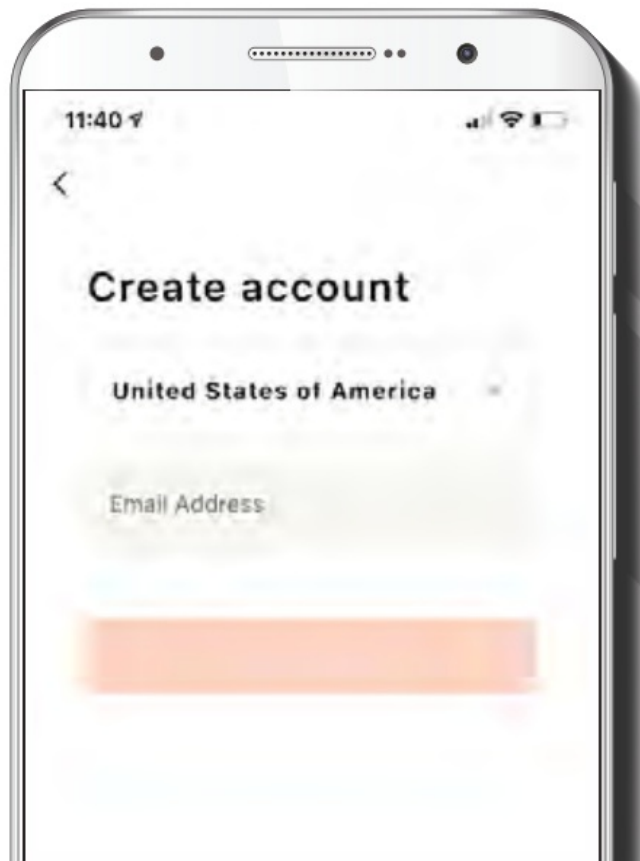

Register by email. Fillin the required fields.
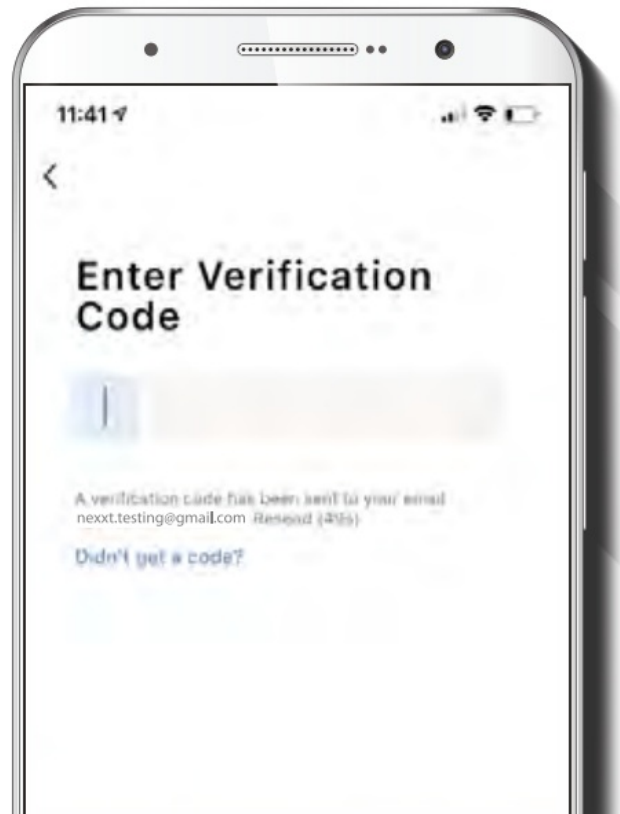

Step 2	Step 3
Enter the verification code you received.	Create a new password and then select Done.
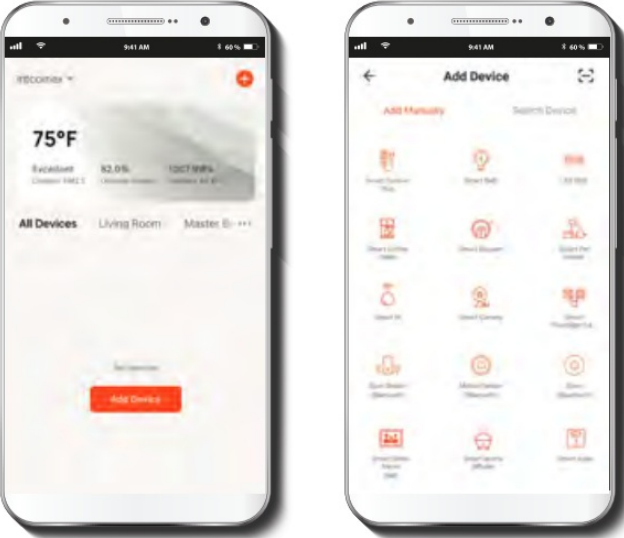

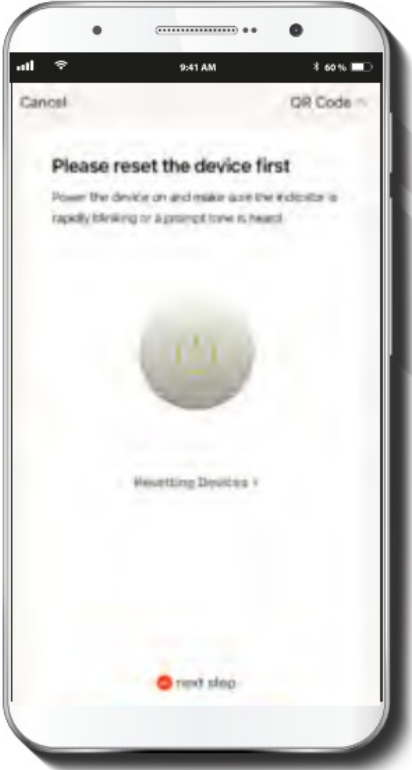

Step 4	Step 5
The Nexxt Home account has been successfully configured.	Assign a home name and a family location. Then click on Save.

Add device

Select the + icon o r the Add device, button to add the device, followed by the Smart Camera icon.	Power on the smart camera and wait for the power-on tone, once it is heard, the LED begins to blink i n red. Click on Next.
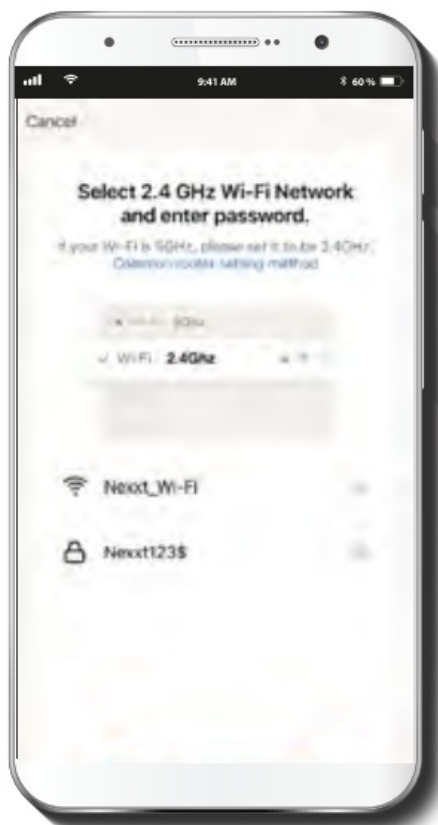

Step 3	Step 4
You must connect to a 2.4GHz WiFi network. Enter your network password. Make sure you enter the correct password, otherwise the device will not connect.	Scan the QR code from your mobile device with the smart camera. Once you hear the tone, click on the | heard a prompt button. I f you experience any issues, reset the camera. If a Registered account added the camera through the app, then another user will be prevented from setting up that camera in a different account, unless permission is granted through the share access option.

Step 5	Step 6	Device name
It will take around 30 seconds to pair the camera depending on the Wi-Fi connection. If pairing is successful, the Notification Added will be displayed on the screen. The device has been added as Smart battery camera.		To rename the device, click on the pencil icon on the screen, enter a different name, and click Save The device is now ready to be configured through the Camera Settings menu.
