Troubleshooting Guide PROBLEMS

Motor Doesn't Start or Blades Don't Rotate.

Food is Unevenly Chopped.

POSSIBLE REASONS & SOLUTIONS

Check that the bottom of motor head is clean and there is no food blocking connection when placing on containers. There is too much food in the pitcher. The unit has overheated. Unplug and wait approximately 10 minutes before using again. Make sure the splashguard is securely on pitcher. Make sure the Master Pod is securely placed on splashguard. Check that the plug is securely inserted into the electrical outlet. Check fuse or breaker. Replace fuse/reset breaker.

Either you are chopping too much food at one time, or the pieces are not small enough. Try cutting the food into smaller pieces of even size and processing smaller amounts per batch.

Food is Chopped Too Fine or is Too Watery.

The food has been over processed. Use brief pulses or process for shorter time. Let blades stop completely between pulses.

Food Collects On Splashguard/ Safety Cover or On the Sides of the pitcher.

You may be processing too much food. Turn the machine Off. When the blades stop rotating, remove the Master Pod and the splashguard. Remove some of the food being processed.

You Cannot Achieve Snow From Do not use ice that has been sitting out or has started to melt. Be sure to use

Solid Ice.

short pulses in the beginning to break up large pieces.

6 Place the Master Pod on top of the splashguard making sure that it is securely in place. (Fig. 2)

7 To start the appliance, plug the power cord into the electrical outlet, securely hold the Master Pod while operating and press on the On/Off pulse button located on the top of the Master Pod. (Fig. 3)

8 Hold the pitcher firmly while depressing the On/Off pulse button to ensure the unit stays in place.

NOTE: DO NOT operate the appliance continuously for more than 15 seconds at a time.

9 To stop the appliance, remove your fingers from the On/Off pulse button.

10 In order to obtain a better quality of chopping, operate the appliance by using the “pulse” method.

11 Make sure that the 40 oz. 4-Blade Assembly has stopped completely before removing the Master Pod.

12 If the ingredients stick to the side of the pitcher, stop the appliance, remove the Master Pod and the splashguard. Use a spatula to dislodge the pieces and then replace the splashguard and the Master Pod. Continue processing.

13 Depending on the consistency of the contents, use the pour spout to empty liquid contents.

14 For thicker consistencies, first remove splashguard and 40 oz. 4-Blade Assembly (by its shaft), then empty contents of the pitcher.

HINTS & TIPS FOR USING YOUR NINJA® · The 40 oz. 4-Blade Assembly can be used for chopping

meat, fish, vegetables, cheese etc.

- For mincing, chopping and pureeing, increase the length of pulses.
- For coarse chopping, use short, quick pulses and monitor food texture.
- Pre-cut larger pieces to make them fit into the pitcher. When chopping hard foods (e.g. meat, cheese) cut into 1-inch cubes.
- To crush ice into snow, start by using short pulses to break up large chunks. Continue until snow is achieved.
