How to remove Joy-con from Switch devices

A.Switch Console and Charging grip

Find the "remove" button on the back of Joy-Con and slide Joy-Con from bottom to top while holding down the state. Release the "remove" button when Joy-Con completely disconnects from the device.

B.Joy-con Strap

Pull down to remove the white lock and hold the Joy-Con wristband and slide Joy-Con down until the wristband completely disengages (no need to press the royal remove button on the back of Joy-Con).

Re-connection and wake up function

Please ensure the console is powered on before re-connection. Press the Home/Capture button to wake up Joy-con, it should connect to the console automatically. You can also slide the joy-con to the console and use it directly. Wake up function is only available when Joy-con is plugged into the switch console. Plug Joy-con into the switch console and press the Home button for 1 second, it can wake up the console.

Warm Tips

Joy-con without IR camera, and does not support games that need IR camera Joy-con does not match with original Grips. Joy-con with 6 Axis function, please ensure 6 Axis of the game is turn on before playing games. Joy-con with dual vibration.

FCC Caution

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirements. The device can be used in portable exposure conditions without.
