**NITSIN LED Floor Lamp Adjustable Standing Lamp with Remote Control**

## Product Information

The Remote Control & Touch Control Floor Lamp is a modern and convenient lighting solution. It allows you to control the lamp through either the remote control or touch control panel. The remote control and floor lamp need to be paired before use. The lamp has three modes of lighting – white light, warm light, and natural light, and it can also be set to turn off automatically after 0.5 or 1 hour of use.

### How to Use the Remote Control

1. Ensure that the floor lamp adapter is powered on for 20 seconds to complete pairing.
2. Long press the switch button of the remote control.
3. When the indicator light flashes, the floor lamp is successfully paired with the remote control.
4. To turn on the light, short press the ON/OFF button of the remote control. Press it again to turn off.
5. To get white light (80% brightness, 4000K color temperature), short press the Read mode button.
6. To set the timer for automatic turn off, short press the 0.5Hr or 1Hr button. The floor lamp will blink three times to indicate that the timer is set.

### How to Use the Touch Control

1. Remove the protective film covering the top of the control panel before use.
2. To turn on the lamp, short press the ON/OFF button on the touch control panel. Press it again to turn off.
3. To adjust the color temperature, short press the Color Temperature M button.
4. To adjust the brightness, long press the Brightness M button.
5. To set the timer for automatic turn off, short press the Timing button. You can choose between 0.5h or 1 hour timing mode, or turn it off at any time.

If you have any questions, help or support, please contact Customer Service email and we will send you more information about this solution.
