ADD YOUR CAMERA TO THE MOBILE APP

We recommend reading the user manual completely, but if you wish to add your new device directly to the app, please follow the steps below:

PRO TIP!

Before installing the camera on its final location, first, perform this setup near your Wi-Fi router and connect your mobile phone to the 2.4GHz Wi-Fi network to which you are going to connect the camera.

1. Download one of the two compatible apps, TUYA SMART or SMART LIFE on your app store, or scan the corresponding QR code:

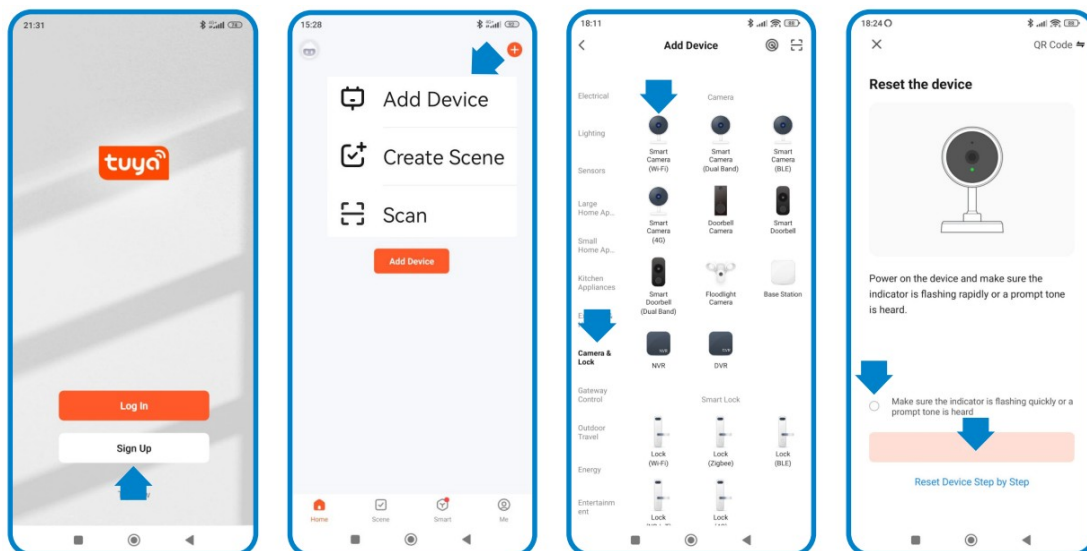

<https://smartapp.tuya.com/tuyasmart/>

<https://smartapp.smart321.com/smartlife/>

2. Sign up for a new account or log in if you already have one.
3. Click on the  icon and select "Add device".
4. On the left column, select "Camera & Lock" and then "Smart Security Camera (Wi-Fi)".
5. Connect the camera to its power supply and wait a few seconds until you see the camera's LED flash and you hear a continuous "beep" sound. You may need to press the Reset button on the camera for more than 5 seconds for it to reboot and activate its "Connection Mode" again.
6. Follow the steps on the app.

If you have any questions, download the FULL MANUAL for more details.
