NODOR 8552 Eclipse

Product Information

This is a ventilation hood product, designed to remove cooking smells and provide air circulation in the kitchen. It features multiple speed settings and a built-in light for visibility during cooking. The product also includes aluminum filters for trapping grease and can be used in both extraction and recirculation modes. The hood is powered by electricity and should be installed following the manufacturer's instructions.

Product Usage Instructions

To use the ventilation hood, follow these steps:

- 1. Ensure the electricity supply is switched off before performing any maintenance or installation work on the
- 2. If the hood is not installed properly on the brackets and causing excessive vibration, take down the appliance and check that it is properly fixed.
- 3. If the fan blade is damaged or the fan motor is not fixed tightly, switch off the appliance and contact qualified service personnel for repair.
- 4. If the light is on but the fan does not work, there may be a jammed fan blade or a damaged motor. Switch off the appliance and contact qualified service personnel for repair.
- 5. If both the light and motor do not work, check the power connection for any loose connections. If necessary, contact Customer Services to check the power supply.
- 6. If the suction performance is reduced, try selecting a higher speed. If the issue persists, clean the aluminum filters according to the care and maintenance section of the user manual.
- 7. If there is an obstruction in the top vent, clear it. If an optional vent kit is installed, ensure it is fitted correctly according to the manufacturer's instructions.
- 8. If cooking smells linger even though the hood works normally, check if the carbon filter is fitted in recirculation mode or if it is full of grease. Fit or replace the carbon filter as necessary.
- 9. If the hood still does not work after checking all the points mentioned above, contact the technical service or your distributor for further assistance.

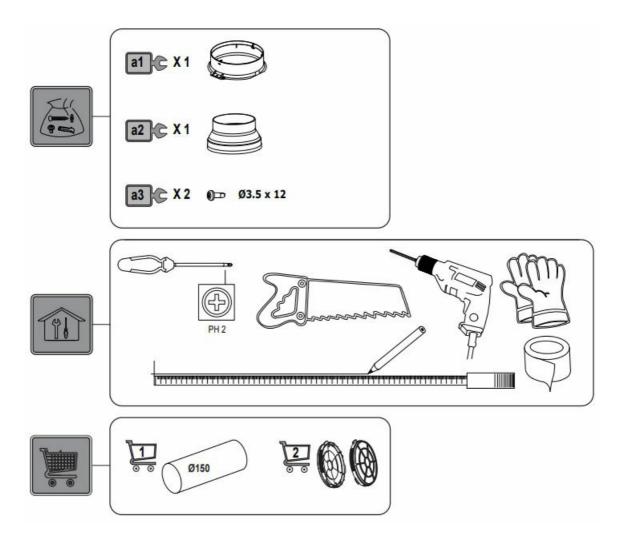

For additional information or assistance, you can contact the importer at the following telephone numbers: +(36-1) 427 0325, +(36-1) 427-0326, or fax: +(36-1) 427 0327. You can also visit their website at www.multikomplex.hu.

Please note that the provided information is based on the text-extract from the user manual and may not cover all aspects of product usage. For complete and accurate instructions, refer to the official user manual provided with

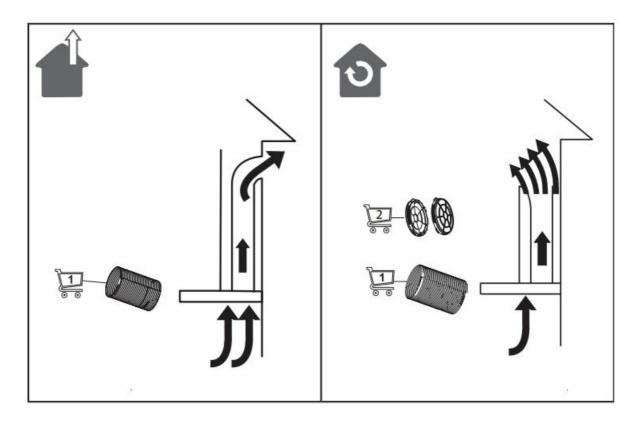

the product.

IMPORTANT: Please read carefully the separate safety guide before use.

Using Instructions

CARE & MAINTENANCE

Warning: always switch off the electricity supply before carrying out maintenance work on the hood. In the event of a fault, contact an official distributor or authorised dealer.

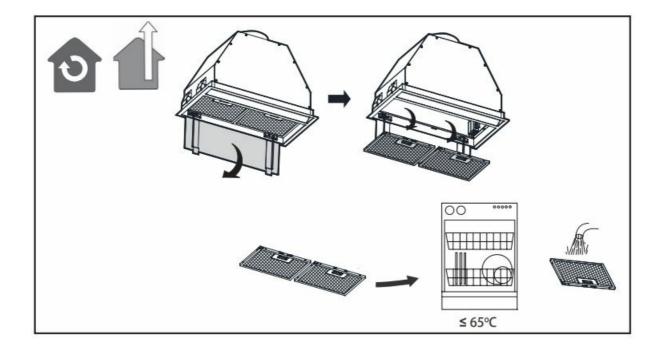

Cleaning the outside: use liquid, non-corrosive detergent and avoid using abrasive cleaning products and solvents. Do not use high-pressure or steam cleaning devices.

Important: increase the filter cleaning/replacement frequency if the hood is used for more than 2 hours a day. Always use genuine filters from the manufacturer.

Grease cleaning

To avoid fires, clean thoroughly once a month or whenever the display pilot light indicates as such. To do so, remove the filters and wash with hot water and detergent. If using a ishwasher (metal parts may turn black without this affecting their functional capacity), load the filters vertically to avoid solid residue from being deposited.

1 MONTH

FAQS

Problem	Possible cause	Solution
Excessive vibration.	The appliance is not installed properly on the brackets.	Take down the appliance and check it is properly fixed.
	The fan blade is damaged.	
	The fan motor is not fixed tightly.	Switch off the appliance. Repair to be car ried out by qualified service personnel onl y.
