QNET STAND

Easily support your QNET NETWORK SWITCH with Sort Kones for optimum performance with resonance control.

COMPONENTS

CENTER PIEC

Pins

LEGS (x3)

TOP

SIDE

BOTTOM

Groove
for Ring

Sort Kone
Depression

RING

ASSEMBLY

Place center piece flat on a table with the pin side up.

Slide 3 legs onto pins with the slot for the rubber gasket and the Sort Kone depressions facing down
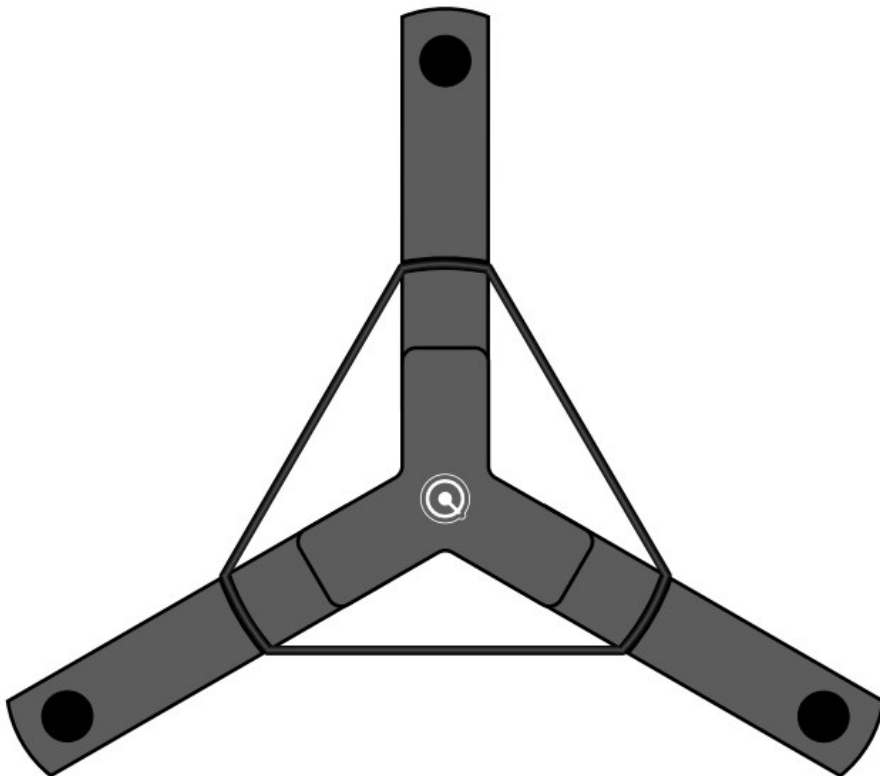

Carefully flip the stand over so that the legs do not slide off.

With the grooves facing up, take the rubber ring and stretch it with both hands so that it can snap into the groove on one of the legs.

Repeat with the second leg, and then the third.

ATTACHING

Lay the QNET upside down (with the vents facing down) on a flat surface. Lay the Stand on it so the legs fall symetrically, or approximately where you would like them.
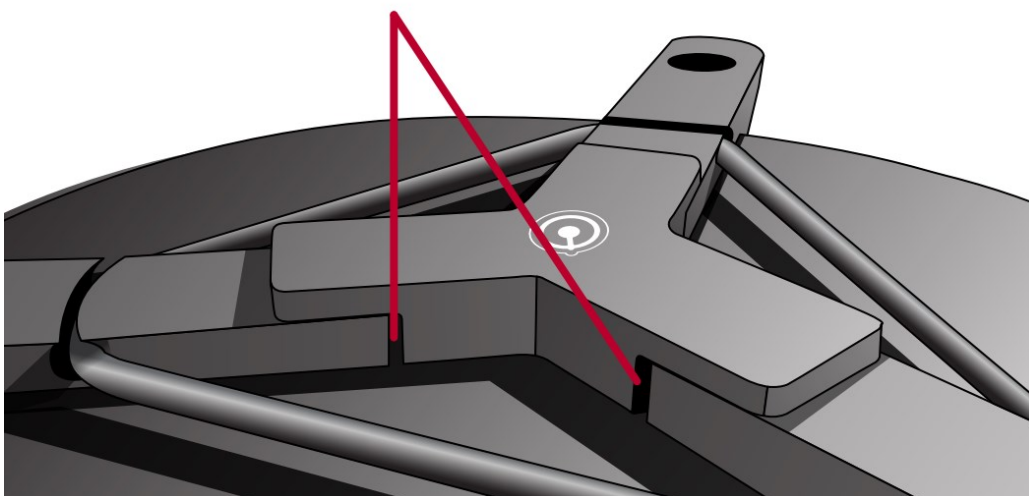

Hook two of the legs onto the edge of the unit and stretch the third so that it can snap on and secure the Stand to the QNET.

FINISHING

Adjust so that the spaces between the legs and the center piece are about even.

Spaces

Flip the unit over and set on three Sort Kones so the tips fit into the depressions.
