NovoConnect NC-X700/NC- X900 High-Resolution Wireless Mirroring and Seamless Switch Installation Guide

2.1 Hardware Installation

Installing X700 or X900 is very simple and straightforward.

The following two figures summarize the key peripheral ports available. (You may refer to the Quick Start Guide for details.)

X700 Key Peripheral Ports

| RJ45 | DC | HDMI | Audio Out |

| microSD | USB-A | USB-C |

X900 Key Peripheral Ports

| RJ45 PoE | DC | HDMI IN | HDMI OUT | Audio Out |

| microSD | USB-A | USB-C |

Typically,
users just need to attach the following four ports

1. Connect the HDMI cable
2. Attach the WiFi antenna
3. Plugin the Ethernet port
4. Apply the DC power with the AC-DC adaptor provided

The AC-DC power adaptor comes with several types of plugs, one of which should be suitable for the power outlets used in your country or region.

AC-DC Adaptor with Changeable Plug

In addition, a simple mounting kit is also available in the package, with which you could mount the X700/X900 main unit in your settings, like on the wall, beneath a conference table, etc.
