How to Use

1. Connect the KM18 to the car cigarette lighter;
2. KM18 will automatically switch on and show the battery level of your car;
3. The multifunction button light and bluetooth logo on the screen will be blinking, that means the KM18 is ready to connect;
4. Turn on the Bluetooth on your mobile phone and find KM18 in your phone's Bluetooth list and click connect;
5. After connect the multifunction button lights and bluetooth logo on the screen will not blink and

will be stable;

6. Choose the same radio frequency between the KM18 and the audio system of your car and you will be fully connected (Radio Frequency start in 87.5MHz to 108.0MHZ);
7. To play music with the TF Card, insert the TF Card with your audio files that the KM18 will recognize and play the music automatically

Important Note

1. For Noise - If the audio has too much noise, please select another radio frequency, maybe the chosen frequency is occupied by a radio station or have too much interference.
2. For Unstable Connection - please firstly try with another phone or tablet; or report your phone model and OS to support@nulaxy.com for a replacement or firmware update.
3. To prevent your car battery from being drained, please be sure to remove the KM18 from the car cigarette lighter after use.
