Before Using

Q.1

How to deal with Bluetooth disconnection, duplicate input and input lag?

1. Check the keyboard power. Low battery power can adversely\ affect the connectivity and overall functionality of the keyboard. For your better experience, fully charge the keyboard with the included USB-C cable before using it for the first time.
2. The delay and disconnection of the Bluetooth device may be interfered with by other devices. Try to stay away from other wireless signal sources.
3. If you are using a Bluetooth receiver for pairing connection, please insert the Bluetooth receiver closer to the keyboard to \make sure the Bluetooth signal is stable. If the Bluetooth signal is still unstable, you can try to use 2.4G USB for connection.
4. Computer lag can cause unstable Bluetooth connection. Please check the computer operation or restart the computer.

Q.2

How to deal with Bluetooth pairing that doesn't work, Bluetooth can't connect problem?

1. Check and make sure that the Bluetooth on your computer is turned on and make sure that the keyboard's connection channel is on the appropriate device. (Up to three devices can be connected, one for each channel)
|
2. Unpair and delete the keyboard's Bluetooth name on your computer's paired device. Navigate to the Bluetooth Settings pane:
   - ⬤ Click Start > Settings > Devices > Bluetooth & other devices.
   - 🗑 Locate your device in the Devices list, click on it and select Remove device.
   - ⌨ Re-pair the device you need on the computer lists.

Q.3

How to charge the keyboard?

1. To charge the keyboard, plug the included USB-C to USB-A cable into the keyboard and laptop respectively. (Or use a 5V/1A charger)
2. During charging, the charging indicator light is red, and theindicator light turns green when fully charged.
3. When the battery is low, the indicator light flashes red. In order not to affect the experience and function of the keyboard, please charge in time.

Q.4

If you are not used to it, please contact customer service

The ergonomic layout and keyboard curve can help solve wrist problems and make it more comfortable. We've heard from some customers that don't adapt to the layout design of the keyboard. So if you don't adapt to it, please stick with it for a while. If you still don't like it, please don't hesitate to contact our service for help. Customer Service: **support@nulea.com**

Work with your favorite

At Nulea, we believe you should choose the work you love and work in an environment that makes you comfortable and happy. Nulea Ergonomic Series is designed for people who demand maximum typing experience with minimum \fatigue and stress. Nulea hopes RT05 will become your favorite keyboard and first choice, OR DO NOT HESITATE to contact **support@nulea.com** for money back. Your suggestion to help us improve is also highly appreciated.
