Nulea RT06 Business Leather Bluetooth Foldable Keyboard

What should you do if your keyboard is not working?

To ensure your keyboard works properly with your computer, connect it to your devices through Bluetooth properly. If your device has already connected, but the keyboard still doesn't work, the connection may have been lost. Here are some possible reasons for this:

1. **Low battery** – Charging your keyboard.
2. Wrong channel – Ensure the keyboard is in the correct connection channel (BT1/BT2/BT3).
3. use on a metal surface – Move the keyboard away from metal surfaces.
4. Radio Frequency (RF) interference – Move away from devices such as wireless speakers, computer power supplies, mobile phones, displays, and garage door remote control switches.

Wireless speaker   Computer power supplies   Mobile phone   Display   Garage door remote control switch

Troubleshoot the problem by checking these factors and other potential issues.
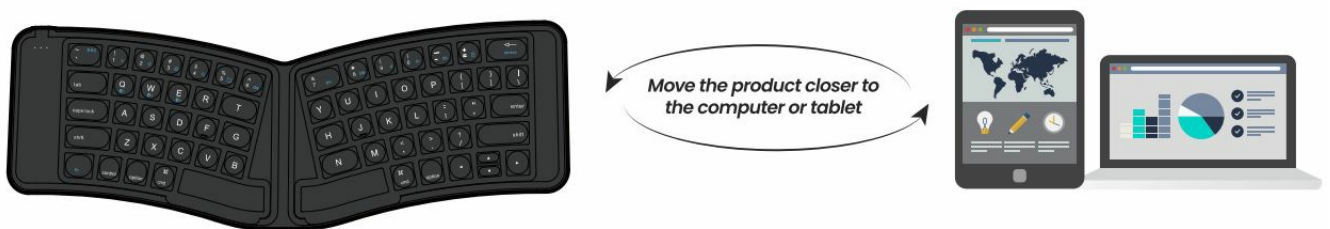

Work with your favorite

- At Nulea, we believe you should choose the work you love and work in an environment that makes you comfortable and happy.
- Nu lea RT06 is designed with both aesthetics and functionality in mind. The sleek, modern and portable design will complement any setup.
- We hope RT06 will become your favorite foldable keyboard and first choice, OR DO NOT HESITATE to contact support@nulea.com for money back. Your suggestion to help us improve is also highly appreciated.

How can you fix frequent disconnections of your keyboard?

If your keyboard keeps losing connection and you have to keep reconnecting it, here are some solutions you can try:

1. Keep other electrical equipment at least 20 cm (8 inches) away from your keyboard.
2. Move your keyboard closer to your device.
3. Disconnect the Bluetooth connection and try to reconnect.

Move the product closer to the computer or tablet

Does the keyboard have a sleep mode?

The Nulea RT06 keyboard has an intelligent sleep mode that helps conserve battery life. The keyboard enters sleep mode 30 minutes after you last used it. To wake it up, simply press any key.

Are the halves able to separate?

This keyboard is not meant to be used separately. The keyboard is a single unit, and unauthorized separation of the keyboard will result in damage and render it unusable.
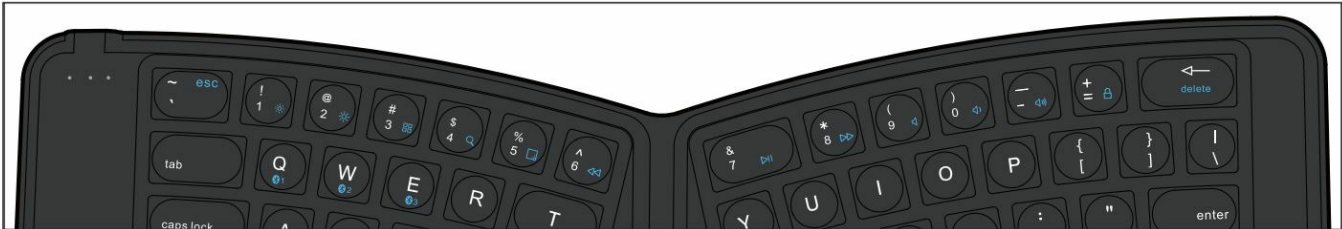

Hardware Basics

1. Power indicator/Charging indicator/Low battery indicator
2. Caps Lock indicator
3. Bluetooth indicator
4. Charging port
