Introduction

Nutale Technology is a well-known name in the industry of premium anti-loss and find equipment using smart tracking technologies. The Nutale key finder has a wide range of applications and can be easily installed on backpacks, keys, and everything that can be hung. It features a simple double-sided tape that is used to paste the finder on remote controls or cards or any other equipment. The key finder can be connected to your phone using Bluetooth or the Finding app. It is compatible with iOS and Android. It features a single click find which means you can simply tap the call icon on the app and the finder on the lost item will start playing music until you find it. The smartphone app keeps a record of the location in real-time of the object which will help you to find it back. The key finder comes with 2 replacement batteries, with each battery having a life of about 10 months. There is another prominent feature of the key finder which allows you to share the device with your friends and family using a QR code with up to 20 people so that your item can be found even quicker.

Package Contents

- 4 * Key Finder – Findthing

Quick Start Guide

Instructions

1. Download the Nut app. Search for "Nut" on the App Store or Google play, alternatively, scan the below QR code to download the Nut app.

2. Registration/Login Open the Nut app to register or log in.
3. Turn on Bluetooth Enable phone Bluetooth and location services before pairing your Nut tracker.
4. Pair Nut tracker via Nut app. Multiple trackers can be paired with one account.
   Up to 12 trackers can be paired with an iPhone. 4-6 Trackers can be paired with an Android phone.
   Tap the "+" button in the Nut app and choose "Bind Bluetooth Tracker". Hold the Nut tracker close to your phone. Press and hold the button until the Nut beeps, select the newly detected Nut tracker to complete pairing.
5. Installing the Strap

6. Nut tracker can be attached to your keychain, bag or other items via the strap.
7. APP Permissions Settings:
   In order to make Nut can work properly, one must make the Nut App resident in the background and keep running; At present, Android system phones have automatic screen cleaning functions, Nut App may be killed by a power assistant or security guards, mobile phone housekeeper etc. So, please Android system mobile phone users just need to set APP protection, make sure Nut APP joins the White list so that Nut app resident in the background continue to run; Nut privilege setting method (Android system): Open APP – click on the upper left corner "+" – click on the bottom of the "anti-throw reminders permission settings" Please refer to their own mobile phone models refer to the operation guidelines one by one set; or refer to the use of instructions to operate; To ensure that the settings take effect, please restart the phone once you have finished setting up one

by one) Apple IOS phone: just need to open the Nut APP to inform the permissions and allow the APP background application can be used to refresh;

Functions

One-Touch Find
Press the "Beep" button within App to call your Nut tracker, when it is connected to your phone.

Find Your Phone
Press the Nut button twice to call your phone, when they are connected. Disconnected Alarm Both the Nut tracker and your phone will sound an alarm when they disconnect. The Nut app will automatically record the 'last know location', this is when the Nut tracker was disconnected from your phone. Using One-touch navigation will guide you to this location.

Find-it Mode
Set the Nut tracker to find-it mode to disable all the anti-loss alarms. Whilst in this mode you can 'share items' with other users.

Smart Silence
There are three 'silent modes' in the Nut App: Set your home and workplace as silent regions. Set bedtime as a silent period or set an interim silent mode for meetings.

FREQUENTLY ASKED QUESTIONS

- **What cell phone can use the normal Nut?**

  Not can use for Apple IOS 8.0 and above system phone and for Android 4.3 above system.

- **What is the distance between the phone and the Nut?**

  Nut effective alarm distance determined by the use of the environment, cannot be free to adjust; ordinary office or home environment alarm to remind the distance of about 15-20 meters, empty environment about 20-30 meters indoor, outdoor about 30-50 meters, the more the interval between the phone and the Nut to remind the distance will be shorter, if there is a wall alarm distance will change shortly; Apple IOS system alarm will delay 10-15 seconds or so; alarm distance slightly more than Android system;
