nVent HOFFMAN PROLINE Plinth Base Stacking Kit

Product Information

The Plinth Base Stacking Kit is a set of components designed to stack plinth bases. It is available in two sizes: 100mm to 100mm and 200mm to 100mm. The kit includes the necessary hardware for installation.

Product Specifications:

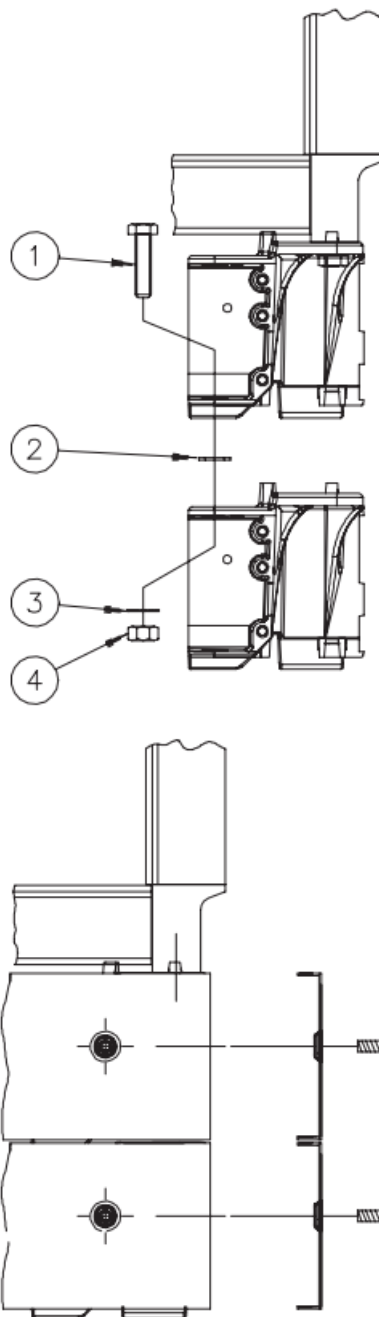

- Model: Rev. B
- Part Numbers: 87550248, 87569436
- Stacking Sizes:
 - 100mm to 100mm
 - 200mm to 100mm
 - 100mm to 200mm
 - 200mm to 200mm
- Maximum Stacking Height: 400mm

Product Usage Instructions

1. Start by arranging the plinth bases in the desired configuration. Both vented and solid bases can be used.
2. Ensure that the stacking height does not exceed 400mm. It is important not to exceed this limit for stability and safety.
3. Use the provided M12x35mm screws to secure the bases together. Use four screws for each base.
4. Tighten the screws securely using an M12 wrench or tool.

Double Bay Enclosures

If the bottom-front or the back cover has excess flex in and out, use reference Detail A. Drill a .25 inch (6.5mm) diameter hole in flanges as shown and install a 10-32x.5 (M5x.02) screw with nut (customer supplied).

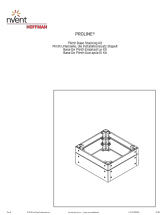

NOTE: Bases may be stacked in any arrangement you so desire with vented and/or solid bases. DO NOT exceed 400mm total stacking height.
