D2C6078 Receiver and Transmitter for Bluetooth Signals

RECEIVER AND TRANSMITTER FOR BLUETOOTH SIGNALS

BTR 4.2 – REFURBISHED

Note: This product is certified B-goods. The goods have been inspected and are in a technically perfect condition. Visual defects on the packaging or on the product itself (scratches, discoloration) can not be excluded and do not constitute grounds for complaint. Of course, your right of withdrawal remains unaffected.

On all refurbished items you get full warranty of 2 years.

The Oehlbach BTR 4.2 Bluetooth transceiver inspires despite its compact format with a variety of applications. The 2in1 adapter allows both sending and receiving audio signals, wirelessly via Bluetooth. Audio signals that are played in analog or via the optical digital input can be sent to compatible headphones or active speakers with the

aid of the Bluetooth 4.2 protocol. In receiver mode, the BTR 4.2 accepts the Bluetooth signal from a mobile device or computer, then outputs it via the transceiver's integrated 3.5mm jack interface. With support for aptX, Qualcomm True Wireless Stereo and an extremely low latency of under 40ms, the Oehlbach BTR 4.2 delivers outstanding acoustic performance in any situation.
