INSIDE THE BOX

SR95S UT Intimidator, (2) o-rings, shoulder strap, AC charger and power cord, user manual

OUTPUT VS RUNTIME

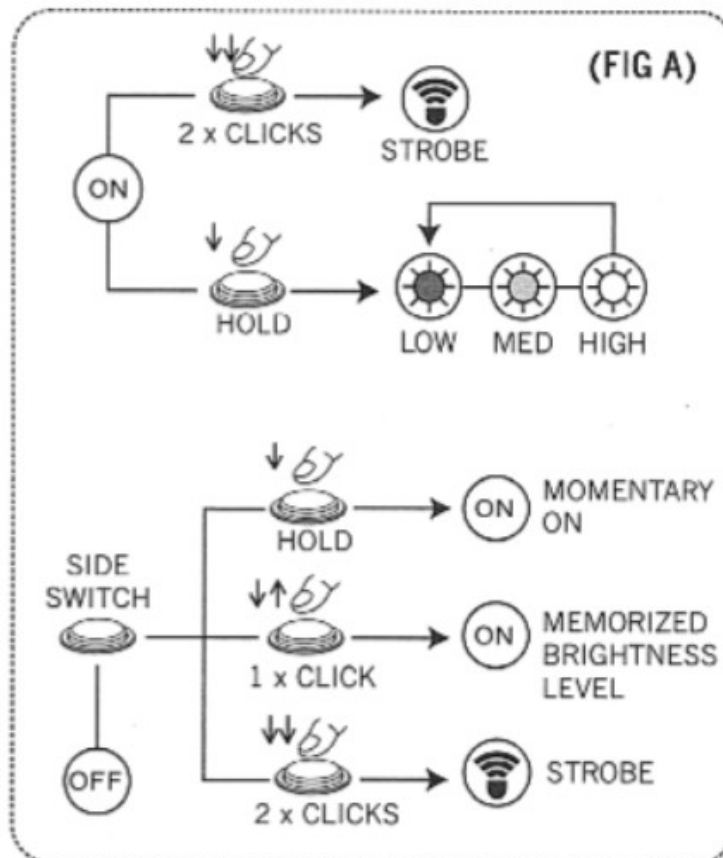

HOW TO OPERATE

ON/OFF: Click the side switch to turn flashlight on.

CHANGE BRIGHTNESS LEVEL (FIG A)

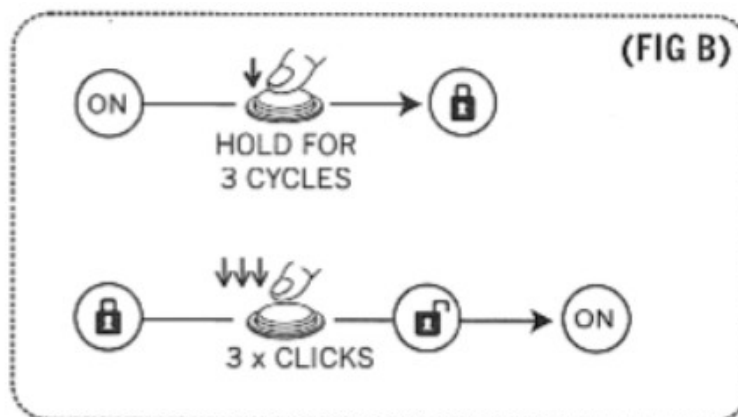

Press and hold the side switch when the light is on. The brightness levels will cycle up then repeat low — medium — high until level is selected.

Release the switch when on the desired brightness level to select it.

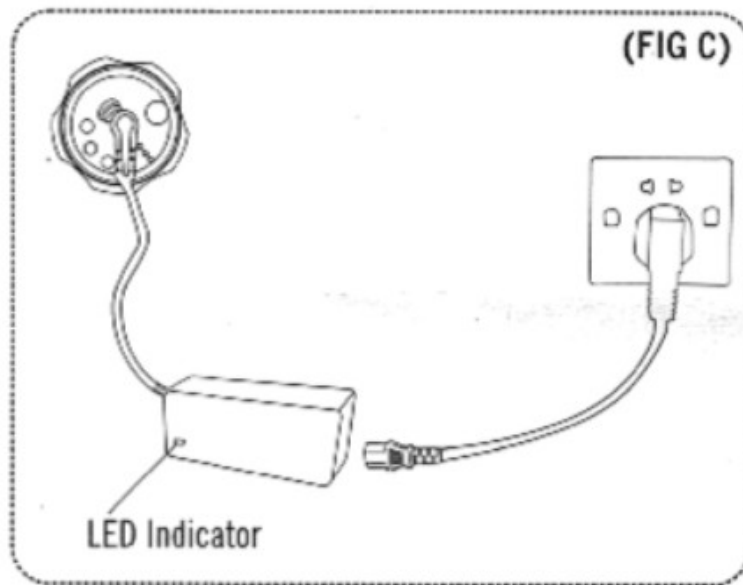

STROBE: Double click the side switch when the light is on or off. Strobe mode is not memorized.

LOCK OUT: (FIG B) When the light is on, press and hold the side switch through three low — medium — high cycles, or approximately 10 seconds. After the third cycle, the light will turn off and be locked. The lock out mode prevents accidental activation.

UNLOCK: (FIG B) Quickly click the side switch three time when the light is locked.

CHARGING THE FLASHLIGHT: (FIG C) Connect the AC charger to the power cord and plug into a wall socket. Insert the barrel plug of the AC charger into the charging port located on the tail of the flashlight battery pack. A LED indicator on the AC charger will be red when charging and turn green when charging is complete. The LED will remain green until unplugged from the wall. After charging is complete, remove the barrel plug from the charging port and cover the port with the rubber plug.

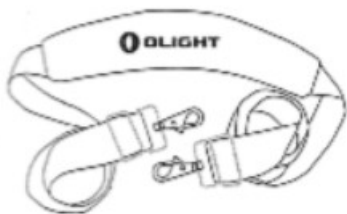

NOTE: If the power indicator button is pressed while charging, all four LEDs will glow. This does not mean the battery pack is fully charged. The battery pack may also be charged without being connected to the flashlight head.

BATTERY POWER INDICATOR: To check the battery level, press the power indicator button on the tail of the flashlight. Green LEDs will glow to represent the amount of power remaining. Four glowing LEDs means the battery is between 75% and 100% power. Three glowing LEDs means the battery is between 50% and 75% power. Two glowing LEDs means the battery is between 25% and 50% power. One glowing LED means the battery is 25% power or lower. If no LEDs glow when the power indicator button is pressed, the battery pack needs to be charged.

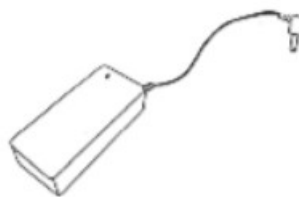

WARNING

When charging is complete, disconnect the power cord from the wall socket then disconnect the barrel port from the battery back. Do not leave plugged in.

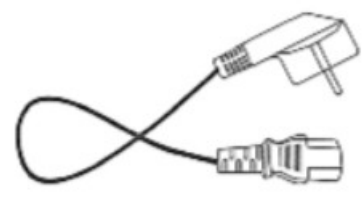

INCLUDEL ACESSORIES

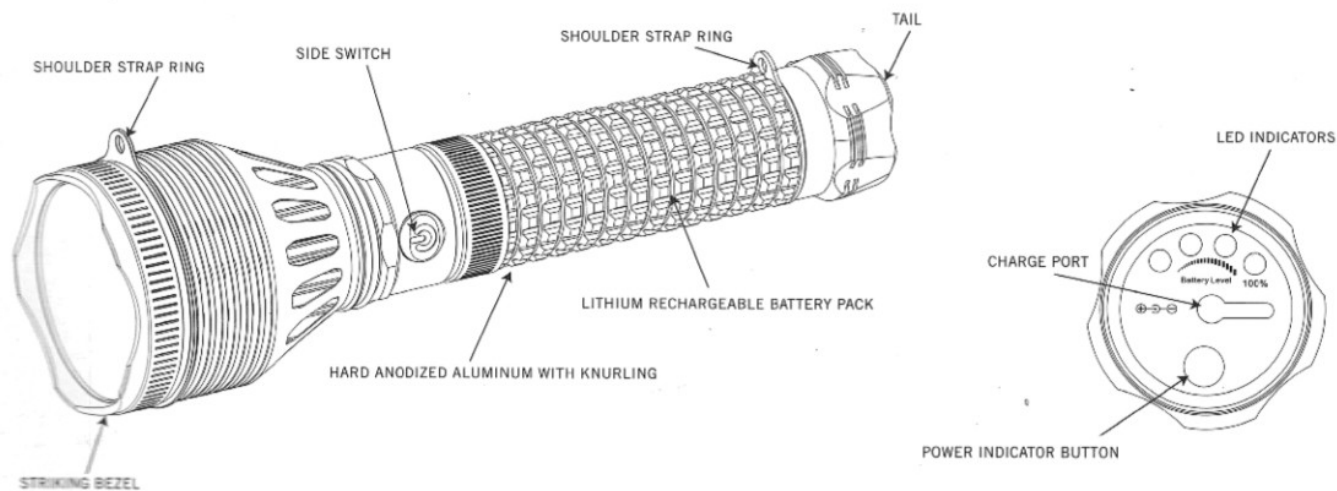

Shoulder strap

AC charger

Power cord

SPECIFICATIONS

OUTPUT & RUNTIME HIGH •	1250 LUMENS / 3 HRS
MED	500 LUMENS / 8 HRS
LOW	150 LUMENS / 48 HRS
