Network Topology

A typical network topology for APs is shown below.

Note: Images may differ from your actual products.

Some APs can be configured and monitored centrally via a controller or the control software. For details, refer to the product specifications and the manual for the relevant product, controller, or control software.

You can get the controller or control software from <https://support.omadanetworks.com/> or contact the sales staff.

Hardware Installation

APs can be connected or mounted in various ways to meet diverse needs. For installation instructions, refer to the Quick Installation Guide included in the product

package.

Customer Support

For technical support, replacement services, user guides, and more, please visit <https://support.omadanetworks.com/>.

For technical support, the user guide and other information, please visit <https://support.omadanetworks.com/>, or simply scan the QR code.
