ONAGAD Folding Fixed Shelf Brackets

PACKAGE CONTENTS

METHOD 1: E TRACK SYSTEM

- STEP 1: Assemble with bolts and nuts
- STEP 2: Snap them into the anchor points of E track
- STEP 3: Place the board on top
- STEP 4: Tighten and secure the board with the short screws

STEP 1: Assemble with
bolts and nuts

STEP 2: Snap them into the
anchor points of E track

STEP 3: Place the
board on top

STEP 4: Tighten and secure the
board with the short screws

Q: Why do the brackets drop down and are not square to the wall when mated to the E-track?

A: By nature of how the e track works , the shelf will have a certain “looseness” to it. It’s normal for the shelf to lean forward a bit. E track is made more for things to pull on it. On the shelf bracket, the physics of the shelf push down on the bottom of the bracket and the result is a bit of a tip forward.

How to Do?

Solution 1: Because each manufacture produce E-tracks that vary in specifications, you will need to go to the store and buy shims of a certain thickness to use the washers as spacers to lift the front edge, depending on the situation.

Solution 2: Attach the rubber pads in the package to the E-track connectors to lift the front edge.

METHOD 2: WALL MOUNTING

- STEP 1: Determine the location of the hole and mark it
- STEP 2: Use a drill to punch the holes
- STEP 3: Put the expansion anchors into the pre-drilled holes
- STEP 4: Put the long screws through the brackets and install them
- STEP 5: Place the board on top
- STEP 6: Tighten and secure the board with the short screws

STEP 1: Determine the location of the hole and mark it

STEP 2: Use a drill to punch the holes

STEP 3: Put the expansion anchors into the pre-drilled holes

STEP 4: Put the long screws through the brackets and install them

STEP 5: Place the board on top

STEP 6: Tighten and secure the board with the short screws
