CAUTION:

Risk of explosion if battery is replaced by an incorrect type. Use quality Alkaline batteries.

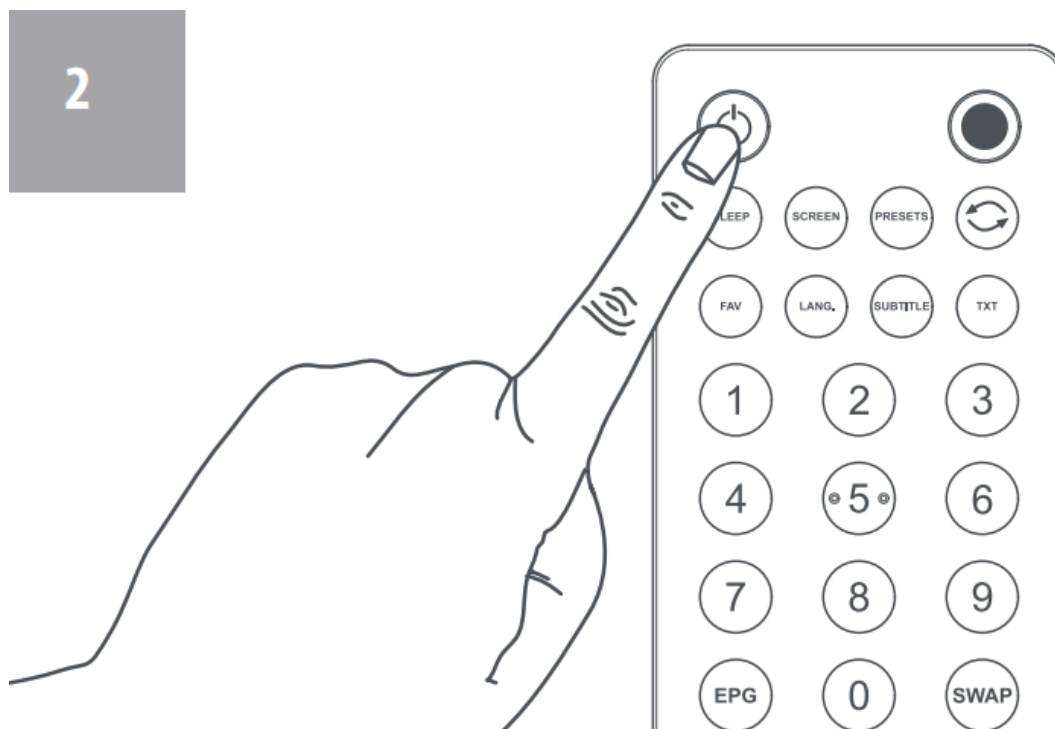

STEP 1: SET UP YOUR TELEVISION

THE MAJORITY OF NEWER SHARP TVS SHOULD WORK DIRECTLY.

After putting batteries in, just test some of the keys, and if they work, your remote is ready. If not, follow the next steps:

Make sure your TV is on
(not on standby).
Hold down RED + BLUE until the
LED blinks twice.

Point towards the TV and hold down the POWER KEY until the TV turns of The remote will send a different Power signal every 3 seconds. As soon as the TV turns off, let go of the POWER KEY. The LED will blink twice. Now test the rest of the keys on the remote. If they work as your original did, your remote is ready to use.

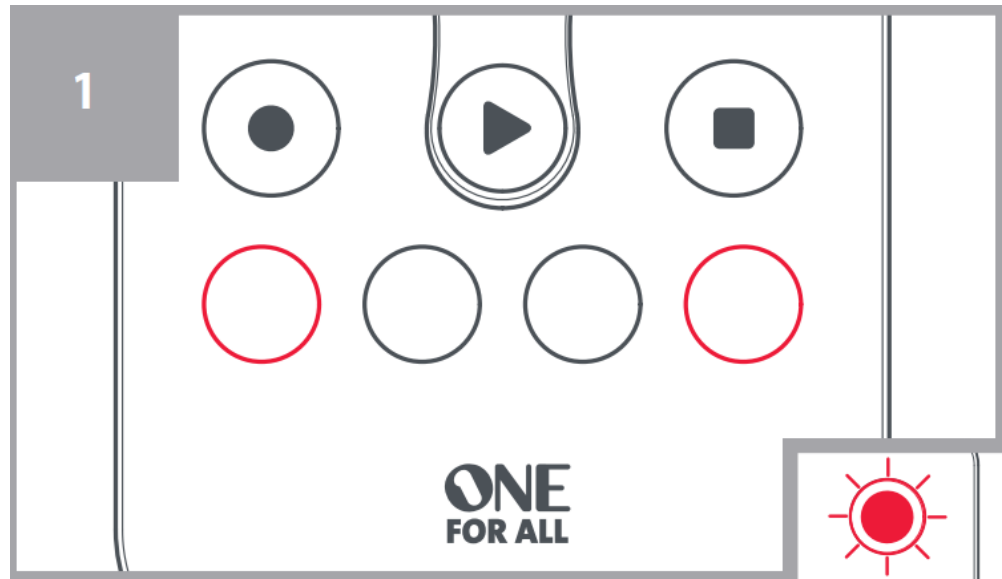

FINISH

If you find some keys still do not work as expected (or not at all), proceed to the next step

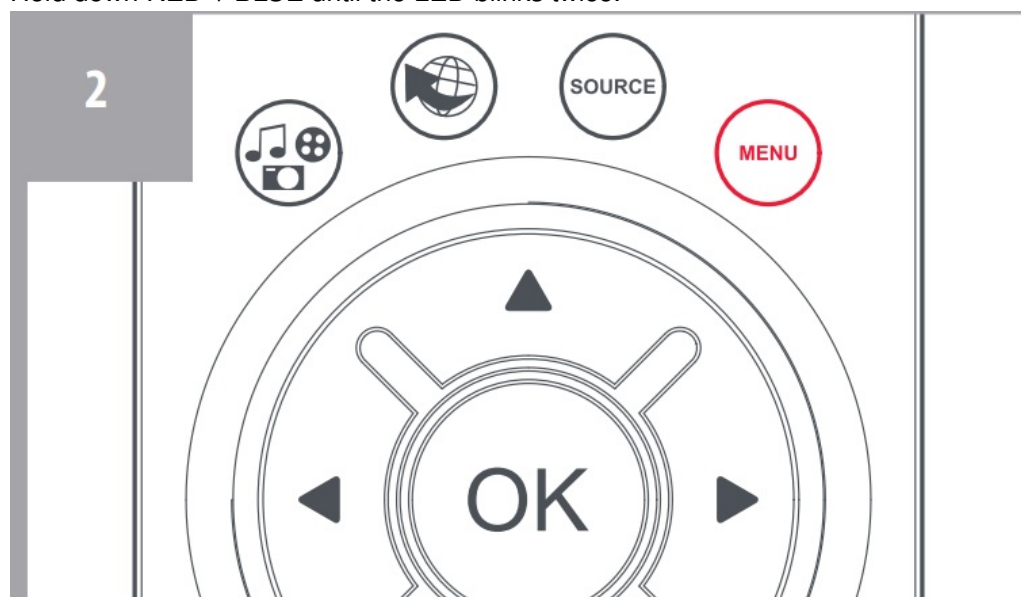

STEP 2: IF STEP 1 DOES NOT WORK AS EXPECTED

ARE SOME KEYS NOT WORKING AS EXPECTED?

If you find some keys do not work as expected (or not at all), proceed to the next step.

Make sure your TV is on (not on standby).
Hold down RED + BLUE until the LED blinks twice.

Point towards the TV and hold one of the keys that is not working correctly (for example MENU).
The remote will send a signal every 3 seconds.

When the correct function is shown on the screen (in this case the MENU), let go of the key.

The LED will blink twice – your remote is ready to use

FINISH
