15. Changing batteries

The battery level is always displayed.

Changing batteries

- Battery lifetime:4-8 months assuming 10 uses per day
- Low battery alarm: Open the battery cover when you hear a low battery alarm to change all 8 1.5V AA batteries with the appropriate +/- position.

- Do not mix batteries of different remaining lifetime levels.

YOu can use 81.5V AA batteries. (Delivered with 4 batteries)

Automatic closing may stop functioning if you do not change the batteries in time.

- Do not mix batteries of different remaining lifetimes, and we suggest you use batteries of the same brand.
- Mixing batteries of a different life may cause leakage.

16. Using the external power terminal

The external power terminal uses DC9V(6F22/FC-1) batteries from the outside to provide emergency power when the door lock completely runs out of energy which disables face recognition/card key/ palm recognition/password.

- You need to purchase DC9V batteries separately. We do not provide DC9V ZSbatteries.
- Limit DC9V uses to emergency uses only because prolonged use of DC9v batteries may cause device malfunctions

This device is for domestic sales. Full A/S support and normal warranty scope may not apply for products bought or used outside of Korea.

However, local dealers will provide installation and A/S support for areas with dealers that import our products.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful

interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF exposure guidelines, This equipment should be installed and operated with a minimum distance of 20cm from the radiator of your body: Use only the supplied antenna.
