How to Connect charging bleand waterproof rubber stopper

When you connect th ra to the solar panel, please confirm that t! ng cable plug is in good contact with camera.

1. Prepare the solar panel with charging cable, take the rubber stopper out.

2

2. Thread the charging cable through the rubber plug.

3

3. Insert the charging cable and firm the rubber stopper.

Incorrect Connection

PLEASE DON'T insert the charging cable directly with the rubber on the plug.

Frequently Asked Questions

Q1: Why doesn't the Wi-Fi name appear when I connect to Wi-Fi?

Q2: Will the camera show red lights when night vision is activated?

A2: The built-in infrared lamp beads make the camera only show some dim red lights when night vision is activated, but the image quality is still clear under no light environment

Q3: What are the requirements for Wi-Fi?

A3: Please use 2.4GHz wireless network. The device does not support the 5GHz wireless network. Meanwhile, please set the Wi-Fi authentication method to WPA2-Personal or other lower level of the security method. A password is required.

Q4: How far should the camera be placed from the router?

A4: After testing, the WiFi connection distance can normally reach up to 100 meters in the open area. However, the actual situation depends on the strength of Wi-Fi and its surrounding environment.

Q5: What is the maximum length of recording time?

A5: You can choose the recording time in the app. The camera records for a fixed time or "auto" mode, when depending on whether there is a person. The maximum length of a video is 3 minutes.

Q6: What should I do when the device is malfunctioning?

AB: Long press the power button to restart the camera.
