Pair & Connect your OontZ Speaker with Echo Show

Step 1: Turn on your OontZ Speaker. The Bluetooth LED Light will flash blue to indicate that the speaker is in pairing mode. If solid blue, your speaker is already paired to a source device. You will need to press and hold the Bluetooth Button on your OontZ Speaker for 3 to 5 seconds until the Bluetooth LED Light flashes blue, your speaker will be in pairing mode, ready to pair and connect.

Step 2: Disconnect any other Bluetooth devices from Amazon Echo Show by turning off the connected Bluetooth device. Amazon Echo Show can only connect to one Bluetooth device at a given time.

Step 3: With your Echo Show turned on, say “Alexa, Go to Settings”.

Step 4: Press “Bluetooth” on the Echo Show screen.

Step 5: Press the name of your OontZ speaker that displays on the Echo Show screen to pair and connect with your OontZ speaker.
Your OontZ speaker is now paired with your Amazon Echo Show device.

Note: To connect the next time, turn on your OontZ speaker and say “Alexa, connect my speaker”. If your OontZ speaker does not automatically reconnect repeat the steps above.
