#### **SERVICE OVERVIEW**

OpenText Extended ECM for Engineering FasTrak Fast track the implementation of OpenText ™ Extended ECM for Engineering.

Benefit from OpenText's extensive experience in engineering document management for capital projects and asbuilt documentation.

B	Accelerate onboarding with hosted prototype system
	Achieve rapid end user adoption and go live faster
	Save costs with faster time to value
	Receive leading practice expertise

Opentext TM Extended ECM for Engineering is one of the most comprehensive engineering and asset information management platforms available for engineering, procurement and construction.

It provides document control to support an entire project lifecycle from initial set-up, design, construction and commissioning to final handover and operation and enables document control managers, engineers, engineering leaders, external collaborators and subsequent operations personnel to efficiently control engineering information, work processes and risk across the lifecycle of projects and operations to help accelerate revenue. But introducing an engineering document management system can be complex due to organization-specific functional requirements pertaining to solution deployment.

The OpenText Extended ECM for Engineering FasTrak service has been designed for faster deployment and rapid scale-up. It allows customers to gain hands-on experience on the standard Extended ECM for Engineering solution before deciding on individual changes that may need to be incorporated. From the first design workshop, customers can experience a fully configured engineering document management system that delivers capabilities familiarization and facilitated, informed configuration design confirmation.

Specialist engineering company enhances efficiency and avoids costly project delays with central document management system based on OpenText ™ Extended ECM for Engineering

"Replacing 12 legacy systems with OpenText Extended ECM for Engineering enables us to reduce our total cost of ownership substantially— contributing to greater operational cost-efficiency and helping us to weather a challenging economy...

Mapping out our workflows and designing the optimal digital processes were complex tasks, but we could always count on OpenText

Professional Services to support us when we needed It. By working closely with our document controllers, OpenText helped us to design effective flows for our processes."

Spokesperson, Energy solutions provider (engineering, procurement and construction)

Read the full Success story

#### Accelerate onboarding with hosted prototype system

Customers will be onboarded from the beginning of the project on a preconfigured OpenText-hosted prototype system. OpenText experts lead familiarization sessions showcasing key use cases addressed by leading-practice solution configurations.

Key users get hands-on experience and support from OpenText experts.

#### Achieve rapid end user adoption and go live faster

Functional requirements are discussed, prototyped and validated in an agile method. Discussion outcomes are formalized as a design specification document informing system configuration. The team can see early on during the design phase what the final system will look like and early hands-on experience improves design decisions and user adoption. With the configuration validated by customer representatives, OpenText transfers configurations to the customer's system.

#### Save costs with faster time to value

This FasTrak solution improves project efficiency and control via process automation, revision transparency and transmittal management. This allows customers to control risk to the project scope, schedule and costs, which ensures faster return on investment by speeding time to production and operations.

#### This FasTrak offering includes:

- · Landing page
- · Workspace concept with roles, permissions, relations
- Master Document workspace, Project workspaces, Transmittal workspaces
- Navigation, filter/facets, folders, general search, advanced search widget, report widgets
- Engineering revision management, document numbering, check-in/out
- Document creation wizard or drag and drop of documents followed by internal review and approval process
- · Intelligent Viewing annotate and commenting
- Agile collaboration with externals via OpenText ™ Core Share
- · Supplier document review and approval
- Transmittals for official exchange of approved/rejected revisions
- Document planning with MDR (master document register) and inbound automation
