opentext TD2u Tableau Forensic Duplicator

GETTING STARTED

Confirm that the Duplicator is off before beginning.

- **Source Drive** – Connect one drive to the Duplicator's source side: SATA, IDE, USB 3.0, or SAS (1)
Tableau Duplicator SAS Expansion Module [TDP6] (sold separately) is needed for SAS drives.
- **Destination Drive(s)** – Connect up to two SATA drives and one USB 3.0 drive to the Duplicator's destination side (2)
- **Duplicator Power** – Connect the power supply to the Duplicator's DC In (3)
- **Power On** – Press the power button and begin operation Before disconnecting a source or destination drive, we recommend powering down the Duplicator.
- **Setup Wizard:** During the initial start-up or following a factory reset, the Setup Wizard will prompt you to configure the default system settings of the Duplicator.
- **USB 2.0 Device Port (Optional)** – Connect a USB storage device to save logs or a USB keyboard for easier data entry via the USB 2.0 port (4)
- **USB 2.0 Update Port** – To update the firmware, connect the Duplicator to your computer via the mini USB port (5) and use the Tableau Firmware Update utility.

CABLE RECOMMENDATIONS

For SATA Drive	Use a Tableau SATA/SAS Signal & Power cable [TC4-8-R2]
For IDE Drive	Use a Tableau IDE Data cable [TC6-8] and Tableau IDE Power cable [TC2-8-R2]
For USB Drive	Use cable supplied with USB drive enclosure or directly connect
For SAS Drive*	Use a Tableau SATA/SAS Signal & Power cable [TC4-8-R2]
For Power(DC In)	Use a Tableau Power Supply [TP5]
For Firmware Updates	Use a Tableau USB cable [TC8]

Tableau Duplicator SAS Expansion Module [TDP6] (sold separately) is needed for SAS drives. For a comprehensive overview of the TD2u features and functions, see the Tableau Forensic TD2u User Guide.

FIRMWARE UPDATES

OpenText releases free firmware updates for Tableau forensic products through the Tableau Firmware Update (TFU) utility. Reference the TFU webpage for more information:
