## Blending Tips

FIGURE 7

- Put liquids in the Blender Jar first, unless a recipe says otherwise.
- Crushing ice: Crush 6 ice cubes or approximately 2 cups of ice. Cover ice with about 1 cup or 0.236 liters of water for best results.
- Do not remove the Blender Lid while in use. Remove Filler Cap smaller ingredients. (Figure 7)
- Cut all firm fruits and vegetables, cooked meats, fish and seafood into pieces no larger than 3/4 inch (1.9 cm) to 1 inch (2.5 cm). Cut all kinds of cheeses into pieces no larger than 3/4 inch (1.9 cm).
- This Blender will not mash potatoes, whip egg whites or substitute dairy toppings, mix stiff dough or grind raw meat.

### Ice Crushing

Without Liquid: Use Pulse button until you achieve desired results. With Liquid: Add desired amount of ice cubes and water until ice floats. Blend on High until you achieve desired results then strain off water.

### Hot Foods

- Open the Filler Cap to vent steam. Tilt Filler Cap away from you. Keep hands away from the cover opening to prevent possible burns.
- When working with hot liquids, remove Filler Cap and start blending at a low speed. Then move to a faster speed. DO NOT add liquid over the 4 cup (0.946 liter) level.

### Cleaning Your Blender

**WARNING:** Unplug before cleaning. Do not immerse the blender base in water or any other liquid. Use a damp, soft sponge with mild detergent to clean the outside of the Blender Base. All parts except for the Blender Base are dishwasher-safe. Place Sealing Ring in bottom basket of dishwasher. You can also wash the parts in warm, soapy water. Rinse well and dry.

### Easy Clean Feature

Quickly and conveniently clean Blender Jar between uses without removing the blade from the jar.

- Pour 3 cups (0.709 liter) of warm water in the blender Jar.
- Add 1 – 2 drops of liquid dishwashing detergent.
- Select Low speed.

- Run blender for 20-30 seconds then press Power button.
- Empty jar of soapy water into sink and rinse the Blender Jar thoroughly with clean water.

#### **NOTE:**

Easy clean is not a substitute for regular cleaning described in the “Cleaning Your Blender” section above. It is especially important to disassemble and thoroughly clean your blender when processing milk, meats, seafood, and eggs.
