Submitting Product Usage Logs:

Methods:

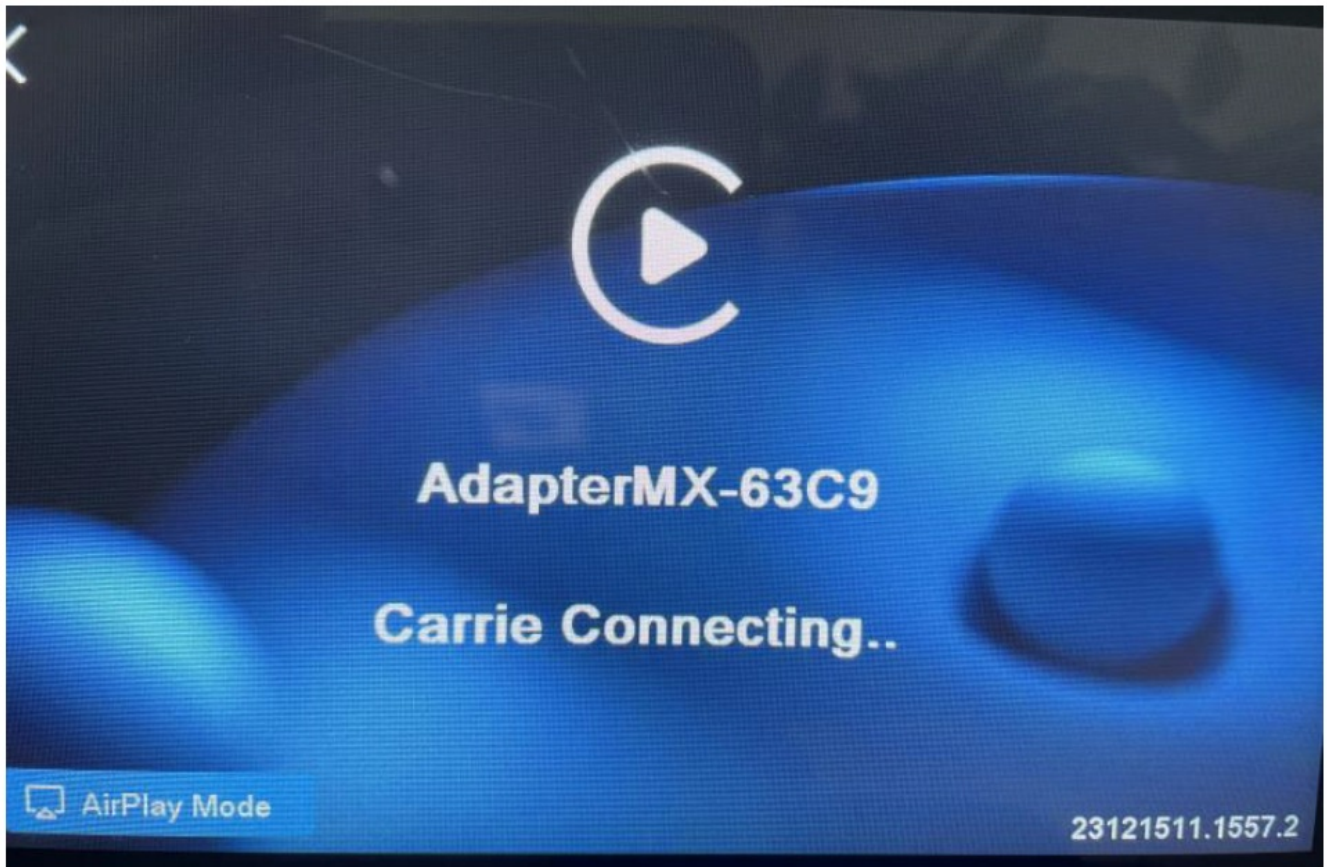

1. Click Report Log on the APP to upload logs.
2. If using an iPhone

Function usage

How to connect MX to use wireless carplay, wireless Android Auto, and Mirroring?

Connect wireless Carplay

1. MX is plugged into the USB interface of the car, which is an interface for connecting iPhones using wired carplay.
2. Make sure your phone's WiFi and Bluetooth options are both turned on. Settings – Network & Internet
3. Use your mobile phone to connect to the Bluetooth of MX. Bluetooth name: AdapterMX-xxxx. After Bluetooth pairing, the Bluetooth interface will appear on the car interface (picture below). (Sometimes you have to click on the CarPlay icon on the car display to enter.
4. After connecting to Bluetooth, you need to click Allow for all prompt pop-ups that appear on your phone. After allowing, you can enter the carplay interface

Connect wireless Android Auto

1. Install the Android Auto App on your smartphone, and then enable [Wireless Android Auto] in the Android Auto App settings. Please make sure your phone's Wi-Fi and Bluetooth functions are turned on.
2. Plug MX into the USB interface, then you can see the device name starting with " AdapterMX-xxxx " on the phone, and pair the phone's Bluetooth with it.
3. Once the connection is complete, allow all pop-ups. At this time, you can connect your phone to MX and use the wireless Android Auto function normally.

Using iPhone Mirroring

1. Quickly click the function button twice to enter the screen projection mode, and the screen projection guidance interface will appear on the screen of the car.

2. Follow the screencasting steps, connect your phone to MX's WiFi, WiFi name: AdapterMX-xxxx, WiFi password: 88888888
3. Enter the quick navigation settings to find Airplay and click on the name of MX to enter iPhone screen mirroring.
