ET-PNT100 Interactive Pointer

Names

Before using the pointer

Screw the long rod into the body of the pointer until it is secure. Install batteries.

How to use the pointer

While pressing the button, when the LED lights, the infrared ray at the end of the rod also lights.

This is sensed by the infrared ray sensor on the front of the projector, and the location of the tip of the pen is detected.

1. Press the power button to turn the power on.
2. Place the tip of the pointer anywhere on the screen.

Thank you for purchasing this Panasonic product.

Before using this product, please read this instructions and “LightPenII: Operation Manual” completely, and save this manual for future use.

3. Pressing the button once has the same function as left-clicking a mouse. Press and hold the button to drag. In pen mode, you can draw lines.

Attention

On status will consume battery power. When not in use, press the power button to turn the power off. (Press the button to confirm that the LED does not light.)

Installing and Removing Batteries

1. Rotate the part as shown in the figure.
2. Install 2 AAA/R03 or AAA/LR03 type batteries.

*Remove the batteries in the reverse order of installation.

Disposal of Old Equipment

Only for European Union and countries with recycling systems

This symbol on the products, packaging, and/or accompanying documents means that used electrical and electronic products must not be mixed with general household waste.

For proper treatment, recovery and recycling of old products, please take them to applicable collection points in accordance with your national legislation.

By disposing of them correctly, you will help to save valuable resources and prevent any potential negative effects on human health and the environment.

For more information about collection and recycling, please contact your local authority.

Penalties may be applicable for incorrect disposal of this waste, in accordance with national legislation.
